**Subject:** RE: URGENT - H23-1295-16 - Proposed pet rabbit breeding unit

**This message originated from outside your organization**

---

As you know this application has caused my client an incredible amount of stress due to an on-line petition with false claims about what was being proposed. We have since spoken about this, I have also now got this petition removed.

In response to your email I will reply where I believe I am in a position to.

My client wants to leave the description as 'proposed building for the breeding of pet rabbits'

The current breeding buildings need replacing due to their age and suitability. The site has also been subject to a family bereavement which has caused the need for a new site for this current business.

The current business has been running for some 20 years.

Rabbits need to be located in a quiet environment hence the proposed site.

The rabbits bred on site are various breeds for the pet markets. They have established order books for a regular supply, for pets shops.

Numbers of rabbits vary on site from time to time. Guinea pigs are also bred as pets, but this is secondary to the rabbits.

The rabbits are kept in open pens with solid floors, they have wood shavings as bedding and are cleaned out on a weekly basis.

The waste is currently stored on site, but this proposal intend to utilise the waste for breeding worms for local fishing purposes.

It is not intended to remove any waste from the site.

I hope you find this acceptable, please do not hesitate to revert back to me should you require any further details.

Regards
