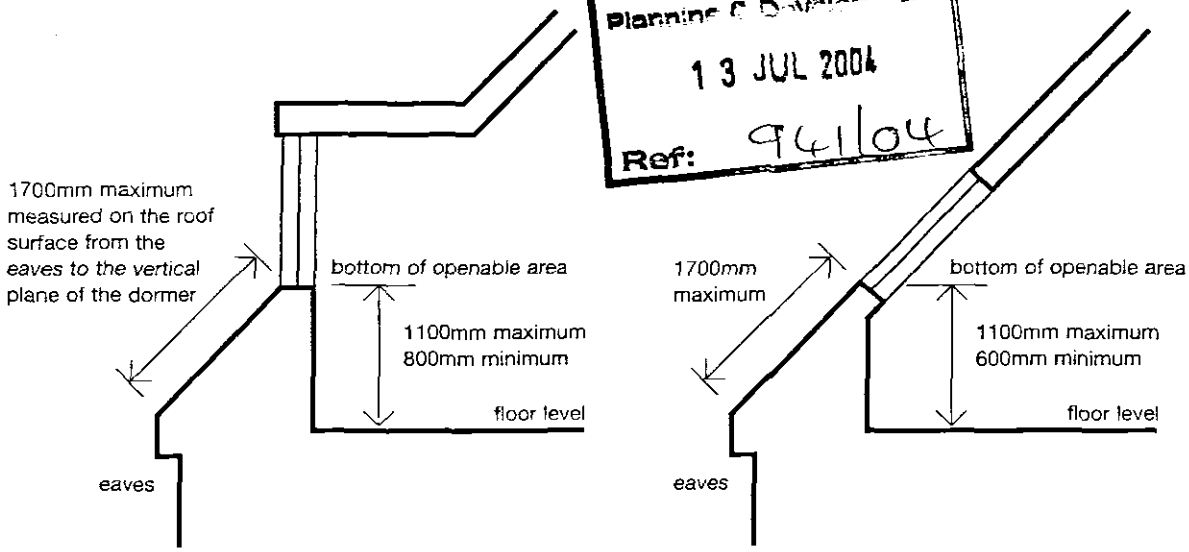
Diagram 6 **Position of dormer window or rooflight suitable for emergency egress purposes from a loft conversion of a 2-storey dwellinghouse**

See paras 2.11(c) and 2.24

Planning & Development
13 JUL 2004
Ref: 941/04



a. DORMER WINDOW
*The window may be in the end wall of* the house, instead of the roof as shown

b. ROOFLIGHT OR ROOF WINDOW

**Note 1:** *The window or rooflight should have a clear opening* which complies with paragraph 2.11a.

**Note 2:** *It is not considered necessary for the window* in Diagram (b) to be provided with safety glazing.

PLANNING APPLICATION H02/0941/04

This is the drawing that was supplied to the builder for the elevation of the bedroom roof light.

However the builder ignored this drawing and in order to satisfy the Building Inspectors it was necessary to fit 7 fire doors to comply with the requirements.

Finally completion certificate B02/0829/02 - 13369 was issued

M. Arbon
