

**Public  
exhibition  
for proposed  
Tydd Solar to  
secure clean  
energy**

November 2023

## The need for solar

Immediate action is needed to make the UK more self-sufficient in energy and to address rising bills.

**The UK needs an extra 56GW of solar energy by 2035.**

This is a significant national challenge that cannot be met by rooftop and brownfield solar projects alone. Addressing the critical need to deliver clean, efficient and affordable electricity will require numerous projects like Tydd Solar to be delivered around the country in the months and years to come.

This project will also help South Holland District Council and Fenland District Council achieve their respective climate change commitments and address the climate emergency. We want to hear from local people about other community aspirations that we could support.

## Benefits of Tydd Solar

**The project we are proposing will deliver a range of local and national benefits, including:**

Solar is the **cheapest form of energy** generation, and Tydd Solar will help to address the rising costs of energy

Solar projects can be **built more quickly** than other technologies, providing an immediate alternative to imports of fossil fuels from overseas

Contributing to local net zero targets across South Holland and Fenland, while **helping to address climate change**

**Creating new habitats** for plants and animals

**Retaining land** in agricultural use, and supporting overall food security

**Enabling farmers to diversify their income**

Enabling us to work with local communities to identify ways we can **support environmental and social projects**

## Have your say

A public exhibition is being held on Thursday 30 November 2023 at Sutton St Edmund Village Hall, 273 Broadgate, Sutton St Edmund, PE12 0LR from 3pm - 7pm.

At the exhibition you will be able to view our proposals, speak to members of the project team and provide feedback.

Further information on our proposals is available on our website **[www.tydddsolar.co.uk](http://www.tydddsolar.co.uk)**

You can also visit **[www.tydddsolar.co.uk](http://www.tydddsolar.co.uk)** to complete a feedback form about our proposals.

If you have any questions, you can get in touch with us by emailing **[communityrelations@tydddsolar.co.uk](mailto:communityrelations@tydddsolar.co.uk)** or give us a call on **0800 3777 348** and a member of the project team will be happy to discuss the proposals with you.

## About PACE

**Pathfinder Clean Energy is a UK company with a successful track record of developing solar projects across the UK.**

We have a vision to develop solar energy projects that meet the UK's rapidly growing need for clean electricity, while working with communities to maximise positive local impacts for wildlife and for people. We are committed to that vision, and have a team including ecologists, landscape and heritage specialists who help ensure our proposals can deliver long term benefits.
