DO NOT SCALE FROM THIS DRAWING

This drawing is the property of the author. The contents of this drawing may not be used or reproduced without the consent of the author. The drawing is prepared for the purpose of obtaining planning permission and building regulation approval only. No responsibility can be accepted for any other use of this drawing. Any discrepancies must be reported to the author before any work is put in hand. Figured dimensions are to be taken in preference to scaled dimensions. Any dimensions critical to the setting out of the building must be checked on site before any work is put in hand. Any discrepancies must be reported to the author before any work is put in hand. The Contractor is responsible for the safety of all persons employed on site and for ensuring that adequate temporary bracing and support is provided to maintain the stability of the building during construction. The Contractor is responsible for ensuring that adequate precautions are taken to prevent the ingress of water into the building during construction. Any proposed variations from the approved drawings must be submitted to the Building Control Officer for approval before work proceeds. All materials and workmanship are to be in accordance with the current British Standard Codes of Practice. Any proposed variations from the approved drawings must be submitted to the Building Control Officer for approval before work proceeds. All materials and workmanship are to be in accordance with the current British Standard Codes of Practice. The Building Regulations 2010 Approved Document C (site preparation and resistance to contaminants and moisture) requires that adequate precautions shall be taken to avoid danger to health and safety caused by contaminants on or in the ground to be covered by the building and any land associated with the building. Reasonable provision shall be made to prevent the passage of ground gas and vapour to the building. Adequate sub-soil drainage shall be provided if it is found necessary because of the presence of water in the sub-soil. Where the existence of unexpected hazards is suspected or discovered, the Local Authority Building Control Officer must be informed immediately. Reasonable provision shall be made to prevent any groundwater contamination caused by the building work. Work that may not need planning permission but may require permission under the Party Wall etc. Act 1996, when building or close proximity to adjoining neighbour's boundaries. Where work is to be carried out to a wall or structure shared with another property, the Building Regulations 2010 as well as the Party Wall etc. Act 1996, when building or close proximity to adjoining neighbour's boundaries. Where work is to be carried out to a wall or structure shared with another property, the Building Regulations 2010 as well as the Party Wall etc. Act 1996, when building or close proximity to adjoining neighbour's boundaries. Where work is to be carried out to a wall or structure shared with another property, the Building Regulations 2010 affected by the work. The General Contractor must be fullyaware of and to the latest codes of practice
