Hi,

Please add to file H02-0012-15. Includes additional information in the form of a photograph of the brick panel and a drawing showing window details.

Thanks

Tracey

I have contacted Neville Hall and he confirmed that the report should be ready by the end of the week and will pass this on when received.

With regard to the brick panel as stated in my email 13 March it is ready for inspection and attach the photo again. Let me know when you wish to come and will arrange to leave the gate open. My bricklayer should be starting any day now.

I attach drawings of the windows/doors. Orders have been placed with the manufacturer so delivery should be in about a 6 weeks time. I have kept the style simple and uncluttered. It will have a wood grain effect.

Regards

Paul Milward

Hi Paul,

Thanks for your response.

However, I need to go on site to look at the freestanding brick panel for condition 7. I also need elevational drawings of scale 1:10 of the windows and doors to be used. Only cross sectional drawings have been provided as yet. If the windows have already been made, then photographs can be used instead.

Re your message which I

believe relates to the archaeological report. I have= left a message with Neville Hall. He did say it would take about 6 weeks to produce. There was nothing found during the excavation for the footings. = Hopefully the report will be completed shortly and will send a copy for you= r information.

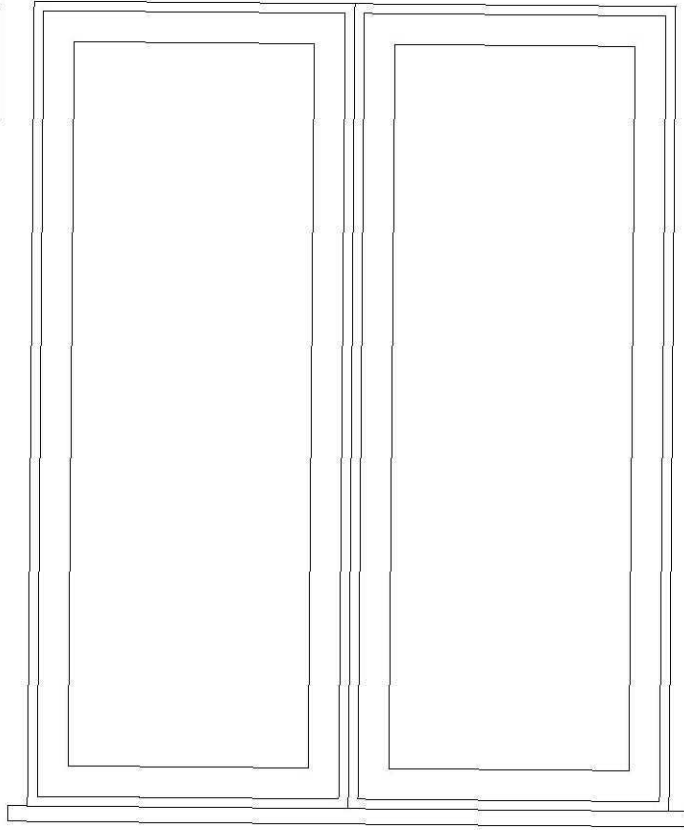

I'll

update you as soon as I have had a response from him.

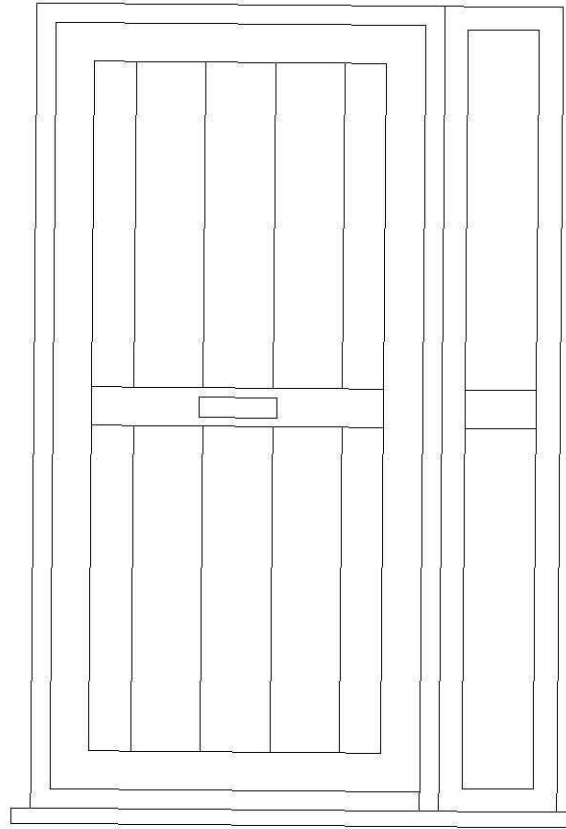

Regards

Paul Milward
