PROPOSED LIGHT INDUSTRY BUILDING FOR EXISTING CAMPER HIRE WITH UPHOLSTERY AND TRIMMING SERVICES at 73 PETERBOROUGH ROAD CROWLAND for 6 COUNTY CAMPERS

DO NOT SCALE FROM THIS DRAWING

This drawing is the property of Julian Warrick Architectural Design Consultant and is protected by the Copyright, Designs and Patents Act 1988. It is issued on the condition that it is not reproduced, retained or disclosed to any unauthorised person either wholly or in part without the written consent of Julian Warrick Architectural Design Consultant. It must be returned on demand. All dimensions must be checked on site before any work is put in hand or any materials or components are ordered. Any discrepancies must be reported immediately to Julian Warrick Architectural Design Consultant. Figured dimensions are to be taken in preference to scaled dimensions. Only materials and workmanship complying with the relevant British Standard Specification or Building Regulations are to be used. Any proposed alterations to the structural elements of this building must be submitted to a Structural Engineer for approval and certification before any work is put in hand. Any proposed alterations to the electrical installations in this building must be submitted to a suitably qualified electrical engineer for approval and certification before any work is put in hand. All electrical work must be carried out by competent persons and must comply with the current I.E.E. Wiring Regulations. Where thermal insulation is installed adjacent to electrical cables, the cables must be surrounded by thermal insulation for a distance of 100mm on all sides. Any proposed alterations to the mechanical installations in this building must be submitted to a suitably qualified mechanical engineer for approval and certification before any work is put in hand. All mechanical work must be carried out by competent persons and must comply with the current Building Regulations. Any proposed alterations to the drainage installations in this building must be submitted to a suitably qualified engineer for approval and certification before any work is put in hand. All drainage work must be carried out by competent persons and must comply with the current Building Regulations. Any proposed alterations to the gas installations in this building must be submitted to a suitably qualified engineer for approval and certification before any work is put in hand. All gas work must be carried out by competent persons and must comply with the current Gas Safety (Installation and Use) Regulations. The premises are to be provided with adequate means of escape in case of fire. Any proposed alterations to the means of escape must be submitted to the Building Control Officer for approval before any work is put in hand. Any proposed alterations to the fire alarm system must be submitted to the Building Control Officer for approval before any work is put in hand. Any proposed alterations to the fire alarm system must be carried out by competent persons and must comply with the current British Standard Specification. Any proposed alterations to the means of escape must be submitted to the Building Control Officer for approval before any work is put in hand
