CASE OFFICER ASSESSMENT

Proposal

The application seeks full planning permission for the siting of three shipping containers at Antique Centre, 197a Nene Terrace Road in Crowland.

Temporary permission was granted for two years under H02-0606-20, this permission has now lapsed and the application is applying for permanent permission.

Site Description

The site is located within the Nene Terrace Business Park, with other business located to the north and north east. To the south is trees and hedgerow along with the East Slipe Drain and to the north west is a neighbouring property.

History

H02-0606-20 - Full - Siting of 3 shipping containers (retrospective) - Approved 14.10.2020

Consultation Responses

The responses received from consultees during the initial consultation exercises, which can be viewed in their entirety through the South Holland website, can be summarised as follows:

SHDC Environmental Protection

No comments

LCC Highway and Lead Local Flood Authority

Recommendation: No objection

The proposal is for Siting of 3 shipping containers - previously approved under H02-0606-20. Retrospective and it does not have an impact on the Public Highway or Surface Water Flood Risk. No Objections.

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, two letters of representation have been received.

These can be summarised as follows:

-Noise concerns
-There are accidents waiting to happen
-There is not enough room for loading and unloading

-This is a crowded area
-This is a dumping ground
-The noise and dust is horrendous

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above.

The policies and provisions set out in the National Planning Policy Framework (December 2023) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

Principle of Development and Sustainability

The South East Lincolnshire Local Plan sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including Minor Service Centres, with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan indicates that within Other Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities. This policy goes on to detail that development within Minor Service Centres will normally be limited to Committed sites and infill.

The application site in this instance is within Nene Terrace, an Other Service Centre, and lies within the defined settlement boundaries as detailed by Policy 1. In context of this, the principle of development within this location is considered to be appropriate, comprising an appropriate form of development for the location and would be in accordance with the overall principles of the spatial strategy.

Taking this further Policy 7 of the Local Plan (Improving South East Lincolnshire's Employment Land Portfolio) states that:

"New employment development/businesses or the extension of an existing business outside the...allocated employment sites will be supported provided that the proposal involves the re-use of previously-developed land or the conversion/re-use of redundant buildings. Where it can be demonstrated that no suitable building capable of conversion/re-use is available or the re-use of previously-developed land is not available or is unsuitable, proposals on non allocated sites may be acceptable provided:
a. the development does not conflict with neighbouring land uses;

b. there is no significant adverse impact upon the character and appearance of the area;
c. the design is responsive to the local context;
d. there will be no significant adverse impact on the local highway network;
e. there will be no significant adverse impact upon the viability of delivering any allocated employment site;
f. proposals maximising opportunities for modal shift away from the private car are demonstrated; and
g. there is an identified need for the business location outside of identified employment areas on the Policies Map."

Whilst it is not a requirement of the Local Plan that all new employment development/businesses be directed to an allocated employment site, Policy 7 does require that it be satisfactorily demonstrated that there is an identified need for the business location outside of identified employment areas. Although the three shipping containers are located outside of an employment site, the use of land has already been established. The containers do not conflict with neighbouring land uses which is a requirement of Policy 7. The sitting of the three containers are therefore considered not to be out of character with the area. The shipping containers are set within the business park and are not prominent from the highway. As such it is considered that the proposal would be in accordance with Policy 7.

As such the principle of such development in this location is acceptable. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, impact on highway safety and flood risk, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2023) specifically relates to 'Achieving well-designed and beautiful places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2023), states that new development should function well and add to the overall quality of the area (including beyond the short term) and should be visually attractive as a result of good architecture and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework, in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The three shipping containers are sited within an established business location with existing containers already on site. The containers are of are to be of a matching appearance to the existing

storage units that are already on site. The containers are located away from the highway and are not readily visible from public vantage points along Nene Terrace Road. The application site also screened with fencing and high hedgerow making the visibility of the units even less.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with policies 2 and 3 of the South East Lincolnshire Local Plan and Section 12 of the National Planning Policy Framework (December 2023).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2023) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

There is a neighbouring property located to the north west that is approximately 33m away from the closet container, with the neighbouring building to the south west being approximately 45m away. It is considered that the sitting of the three shipping containers would not cause an unacceptable impact with regards to overbearing impact or unacceptable overshadowing.

It should be noted that temporary permission was granted for two years under H02-0606-20, this permission has now lapsed, and the application is applying for permanent permission, therefore the containers are already sited. Objections have been received with regards to dust and noise, however, Environmental Protection have been consulted and have raised no objections, it is therefore considered that on balance there would be no unacceptable impact to the neighbouring properties.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2023), and Policies 2 and 3 of the Local Plan.

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2023) specifically relates to 'Promoting sustainable transport'. Paragraph 115 of the National Planning Policy Framework (December 2023) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, policy 36, to be read in conjunction with Appendix 6 of the South East Lincolnshire Local Plan, sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The additional vehicle movements associated with the proposed containers would not be expected to have any material impact upon the safety or the capacity of the local highway network. The Local Highway Authority have been consulted and have not raised any objections stating, "the proposal is for Siting of 3 shipping containers - previously approved under H02-0606-20. Retrospective and it does not have an impact on the Public Highway or Surface Water Flood Risk."

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Local Plan Policies 2, 3 and 36, and Section 9 of the National Planning Policy Framework (December 2023).

Flooding Considerations

Section 14 of the National Planning policy Framework (December 2023) requires development plans to "apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

Paragraph 168 details "The aim of the sequential test is to steer new development to areas with the lowest risk of flooding from any source. Development should not be allocated or permitted if there are reasonably available sites appropriate for the proposed development in areas with a lower risk of flooding", with the sequential approach being required in areas known to be at risk now or in the future from any form of flooding, with the flood risk assessment being the tool to demonstrate this.

If, following the application of the Sequential Test, it is not possible, consistent with wider sustainability objectives, for the development to be located in zones with a lower probability of flooding, the Exceptions Test can be applied if appropriate.

The site lies within Flood Zone 3 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The proposed development is classed as 'less vulnerable' therefore it can be considered in accordance with details contained in the Standard Advice Matrix in the SELLP. As such the exceptions test is not required.

The risk of flooding at the site is very low and it is only the risk of tidal breach during the 0.5% annual probability (1 in 200 chance each year) even with climate change that could lead to flooding. The site is within an area of no hazard within the South East Lincolnshire Strategic Flood Risk Assessment. The proposal constitutes commercial less vulnerable development. The building is not for habitation with only short term and intermittent occupancy by workers. Consequently, there are no significant flood risk issues.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, it is considered that the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan and the intentions of the National Planning policy Framework in this regard.

Biodiversity

Section 15 of the National Planning Policy Framework (NPPF) seeks to protect sites of biodiversity value, minimise and provide net gains for biodiversity, including establishing coherent ecological networks that are more resilient to current and future pressures. Policy 28 of the SELLP seeks to protect ecological networks of interconnected designated sites and wildlife-friendly greenspace and

promote biodiversity net gain by protecting the biodiversity value of land, maximising opportunities to enhance and connect natural habitats, incorporate biodiversity conservation features to enhance green infrastructure and ecological corridors, and conserve or enhance habitat to adapt to climate change.

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain

For applications that are submitted prior to the introduction of this requirement, a standard biodiversity condition is appropriate and the mandatory 10% requirement would not apply. However, this application was submitted following the introduction of this legislation. As such, unless comprising development that is exempt from this mandatory Biodiversity net Gain (10%), a condition would be required, as mandatorily set.

In this instance, a Biodiversity Net Gain Metric and Assessment was submitted with the application. Any application that is fully retrospective and was carried out prior to mandatory BNG is considered exempt as they fall into Section 73a of TCPA, which allows applications for development which has already been carried out prior to the submission of an application. It is of the understanding in this scenario is that the date of application is retrospectively deemed to be the date that the work of completed. So, in all likelihood, this application is BNG exempt.

The Senior Ecologist was consulted on this application and raised no comments.

In light of this, the development is this instance is exempt from the statutory 10% Biodiversity net Gain requirements. However, it would remain appropriate, given the context of Section 15 of the NPPF and requirements of Policy 28 of the South East Lincolnshire Local Plan, that a standard condition is attached, requiring a level of Biodiversity Net Gain.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan and the provisions of the National Planning policy Framework when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with policies 1, 2, 3, 4, 7 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (SELLP) (2019), along with the identified sections contained within the National Planning Policy Framework (NPFF) (December 2023). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
