CASE OFFICER ASSESSMENT

Proposal

This is a Section 73 application seeking permission to modify Condition 2 of H02-0657-23 to allow for a change to the roof tiles of the dwelling.

The variations proposed comprise a change to the roof tiles only, changing them from red/brown pantiles to crest double pantile in a rustic red design.

Site Description

The site lies within the settlement boundary of Crowland and is within the Conservation Area as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP). The dwelling is the end building of a row of four terraced properties. This specific property is made of a cream render with red tiled roof and white uPVC windows. The property has a long garden to the rear which currently appears to be overgrown and features a large tree at the end. The garden is directly adjacent to a tennis court.

History

H02-0657-23 - Proposed front extension including demolition of existing section of building, alterations and new door to outbuilding - Approved

Consultation Responses

Crowland Parish Council

CPC rely on the proper authority to ensure the proposition is in sympathy with nearby properties.

Lincolnshire County Council Historic Places

Thank you for consulting us on this.

Having reviewed the application documents and the updated available Historic Environment information for this application, the proposal is unlikely to have an impact on significant archaeological remains. Consequently, no further archaeological input is necessary for this application. It is not necessary to consult us on this application again, unless there are material changes to the proposals. However, if you would like advice from us, please contact us to explain your request.

Finally, considering the proposal is within the Conservation Area: Crowland (DLI10597), the SHDC Conservation officer must be consulted before a decision is made.

South Holland District Council Conservation Officer

No objections.

North Level Internal Drainage Board

No comments.

Planning Considerations

Evaluation - Section 73

The proposal relates to the variation of Condition 2 and 14 of H23-0070-23, through seeking permission under Section 73 of the Act. The purpose of an application made under Section 73 of the Town and Country Planning Act 1990 is to vary or remove conditions associated with an existing

planning permission. These applications are used to allow for amendments to an approved scheme and can be made both retrospectively and prior to a permission being implemented, as long as the permission is extant.

The Act is very clear that: "On such an application the Local Planning Authority shall consider only the question of the conditions subject to which planning permission should be granted." As such, the Local Planning Authority are not able to revisit the principle of development and only matters relevant to the specific conditions can be considered. The effect of granting permission would be to issue a new permission with Condition 2 being amended.

Planning practice guidance highlights that where less substantial changes are proposed, amending a proposal can occur through 'Amending the conditions attached to the planning permission, including seeking to make minor material amendments'.

The PPG clarifies that "Permission granted under Section 73 takes effect as a new, independent permission to carry out the same development as previously permitted subject to new or amended conditions. The new permission sits alongside the original permission, which remains intact and unamended. It is open to the applicant to decide whether to implement the new permission or the one originally granted". There is no statutory definition of a 'minor material amendment'; but this is likely to include any amendments where its scale and/or nature results "in a development which is not substantially different from the one which has been approved".

In this instance, the subsequent amendments, submitted under this Section 73 application, have not varied the description of development. Likewise, the red outline provided with the ordnance survey site location plan has not been altered and matches that of the initial submission.

In the case of R (Vue Entertainment Limited) v City of York Council, it was concluded that the decision gives clear support for use of s.73 in respect of changes to condition which go beyond 'minor' amendments. It places a clear emphasis on preserving the precise terms of the grant. If an amendment to a condition can be made which keeps the description of the development intact it may well be appropriate to make such an application under a s.73, even if the affect of the change will be significant".

Taking all of the above into account, the Local Planning Authority are content that the proposed amendments can be considered under a variation application, via a Section 73 application.

Principle of Development and Sustainability

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed above.

The policies and provisions set out in the National Planning Policy Framework (updated December 2024) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

This application seeks to modify condition 2 (approved plans) of the previous approval. This variation seeks amendments to choice of the roof tiles.

In light of the above, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan when viewed in principle. As outlined within the report above, the principle of development has been established, with the development having commenced and therefore, remaining extant. When viewed as a whole, coupled with the proposal comprising a section 73 application to vary the approved plans, the proposal is acceptable in principle.

This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, impact on highway safety and flood risk, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The proposed change is very minor in relation to the entire site and surrounding area, it would only the change roof tiles. This should not result in harm to the area following such a change due to the minor scale of change proposed. Whilst it would result in the roof tiles conflicting with the other existing adjoining properties, there are a variety of designs in the immediate area showing that there is no set design for what roof tiles should be used or the colour.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

As the application is only varying the type and colour of the roof tiles and does not create any new openings through extra windows or doors nor would it extend from any elevation this ensures there would be no material overlooking or overshadowing.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Heritage Matters

In respect of any buildings or other land in a conservation area, special attention must be paid to the desirability of preserving or enhancing the character or appearance of that area, through Section 72 the Planning (Listed Buildings and Conservation Areas) Act 1990.

Policy 29 (The Historic Environment) states amongst other matters that the distinctive elements of the South East Lincolnshire historic environment will be conserved and, where appropriate, enhanced, in keeping with the policies in the National Planning Policy Framework (December 2024). Development proposals will expected to conserve and enhance the character and appearance of designated and non-designated heritage assets, including archaeology, historic buildings, conservation areas, scheduled monuments, street patterns, streetscapes, landscapes, parks (including Registered Parks and Gardens), river frontages, structures and their settings through high-quality sensitive design.

South Holland District Council's Conservation Officer was consulted on this application due to it being located within the Crowland Conservation Area, through this consultation, no objection was raised. Furthermore, Lincolnshire County Council Historic Places were also consulted and also raised no objection. As the changes solely relate to a change of material for the roof tiles this is a change of a very minor scale and therefore the proposal would cause no discernible harm to the historic nature of the area.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, or the historic environment whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3 and 29 of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2024). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
