While it is disappointing that the town will be losing a shop, we have concerns regarding the proposed change of use to residential. In particular, the impact on parking in the area, as well as where the four new plastic waste and recycling bins will be stored. We would ask that consideration is given to ensuring the bins can be stored appropriately and discreetly without causing obstruction or detracting from the appearance of the area.
We hope that these matters will be carefully considered before the application is determined.
