masterframe®

masterframe®

Masterframe was started in 1988 as a small family firm specialising in the design and manufacture of vertically sliding PVC-u sash windows.

Today, our expertise and experience has ensured our windows far exceed the normal expectations for such products.

As we only produce sliding sash windows, you can be sure that the investment we have made in machinery and new technology will produce a quality unsurpassed.

With a range of products, we are confident that we have a style to suit every type of installation.
