CASE OFFICER ASSESSMENT

Proposal

This is a full application seeking permission for the change of use of an Office of Class E (g)(i) to Residential of Class C3 at Decoy Farm, Spalding Road, Crowland.

Site Description

The site is situated on an agricultural holding of Decoy Farm. The site has a shared entrance with two detached properties to the south of the building. Decoy Farm has operated as a green waste composting facility for many years and, together with an Anaerobic Digestion (AD) plant and a solar farm, is now becoming a hub for green waste processing and the generation of renewable energy. The property is characterised by an L-shaped single storey barn conversion, projecting forward from the agricultural buildings to the rear of the site.

History

No planning history relevant to this application.

Consultation Responses

North Level IDB

No objections in principle.

Crowland Parish Council

No objections.

SHDC Environmental Protection Officer (noise and odour)

No objection on the basis that property is to remain in ownership of applicant.

SHDC Environmental Protection Officer (contaminated land)

Request the standard land contamination conditions be applied at this location.

Local Highway and Lead Local Flood Authority

Does not wish to restrict the grant of permission. The proposed dwelling would utilise the existing access that already serves the Applicants' existing residential properties and whilst ideally, this vehicle access crossing would benefit from being brought up to the highway authority's current domestic access specification, and the roadside vegetation adjacent to the access would benefit some trimming-back to improve visibility, that access has hitherto proven itself to be safe and suitable for such use. Therefore, having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed use of this building as a dwelling, in the accordance with details outlined in the submitted supporting letter, would not be expected to have an unacceptable impact upon highway safety and so the authority does not wish to object to this planning application.

Planning Considerations

Principle of development

Policy 1 of the South East Lincolnshire Local Plan, 2019 indicates that new development will be permitted in the countryside where it is necessary to such a location and/or where it can be demonstrated that it meets the sustainable development needs of the area in terms of economic, community or environmental benefits.

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, states that the determination must be made in accordance with the development plan unless material considerations indicate otherwise.

The site is located outside of a settlement limit as defined in the South East Lincolnshire Local Plan (SELLP), 2019. Policy 23 of the SELLP indicates that proposals for the conversion of existing buildings which are located outside defined settlement boundaries to residential use will be permitted provided that:

1. the building is structurally sound and capable of conversion without the need for significant extension, alteration or rebuilding;
2. the building is of architectural or historic merit or makes a positive contribution to the character of the landscape, to justify conversion to ensure retention;
3. the proposal is in keeping with its surroundings;
4. the design is sympathetic to the character and appearance of the building in terms of architectural detailing and materials of construction; and
5. development leads to an enhancement of the immediate setting of the building.

Where permission is granted, permitted development rights may be removed in order to control future alterations or extensions that may impact on the appearance and character of the surrounding area.

Addressing the above, the covering letter accompanying the application states that there are minimal works required for the change of use, apart from a roof light and a window on the east elevation. Therefore, the traditional farm building would not be dramatically altered, and the proposal would be in keeping with the surroundings.

The building is considered to be of some historic merit, being a traditional 20th Century Fenland farm building, and a rural feature that should be preserved within this rural setting. This proposal is a means of seeking its retention. The conversion would be carried out in a sensitive manner and provide a satisfactory level of living accommodation for future occupiers. Whilst the development does not necessarily constitute an enhancement, it would proposal retain the building's character, which would be preferable to it being out of use and deteriorating in condition.

On balance, it is considered that the proposal satisfactorily complies with the aims and objectives of Policy 23 of the SELLP.

Layout, Design, Size and Scale

Paragraph 127 of National Planning Policy Framework (NPPF), 2019 establishes that planning policies and decisions should ensure that developments are visually attractive as a result of good architecture and sympathetic to local character and history, including the surrounding built environment and landscape setting, among other considerations. Likewise, Policy 2 of the SELLP states that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

The building is visible from Spalding Road but minimal external alterations are proposed. As such, it would not appear that the change of use of the building would have a detrimental impact on the street scene or upon the neighbouring dwellings to the south.

In summary, the proposals are visually acceptable within the locality and comply with Policy 2 of the SELLP and Section 127 of the NPPF.

Amenity

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) set out residential amenity and the relationship to existing development and land uses as main considerations when making planning decisions. They are consistent with advice within the Framework (2021). Paragraph 130, amongst

other matters, seeks places with a high standard of amenity for existing and future users.

The nearest residential property is Fen End Barn sited approx. 10m to the north west. There is also no.1 and 2 Decoy Farm, Spalding Road, which are approx. 23m to the south. The building at the rear is within the same ownership and will remain as storage, including a service courtyard area. By virtue of the positioning of windows and separation distances involved, it is considered that the amenity of occupiers of neighbouring properties would not be materially harmed in terms of overlooking, lack of privacy, overshadowing etc.

SHDC's Environmental Protection Officer has no objection on the basis that the property is to remain in the ownership of the applicant and it will therefore be within their control as to who it is occupied by.

The proposal satisfactorily complies with Policies 2 and 3 of the South East Lincolnshire Local Plan, 2019 in this respect.

Highway Safety

Policies 2 and 3 of the SELLP indicate that sustainable development considerations should be met in terms of access and vehicle generation levels and layout of car parking. Policy 36 and Appendix 6 set out the minimum standards for parking provision based upon the use class. Two spaces for dwellings with 3 or less bedrooms should be provided within the curtilage.

The existing entrance which serves the two detached dwellings to the south, will also served the proposed dwelling. There is provision on site for the parking of two vehicles. LCC Highways have raised no objections.

The proposal therefore satisfactorily complies with Policies 2, 3 and 36 of the South East Lincolnshire Local Plan, 2019 in terms of highway safety/parking requirements.

Flood Risk/Drainage

The application site is situated in Environment Agency Flood Zone 1, however it is shown in the South East Lincolnshire Strategic Flood Risk Assessment (March 2017) (SFRA) as being at increased risk in 2115 in the case of a breach of defences.

The National Planning Policy Framework states at Paragraph 167 that minor development and changes of use applications should not be subject to the sequential or exceptions tests, unless falling within certain types of development. Given the nature of the scheme, neither the sequential or exception test is required in this case. However, it is still necessary to ensure appropriate mitigation measures are in place given the increased risk in the future.

The SFRA mapping shows that the sites falls within a "Low Hazard" hazard zone, with potential flood depths of up to 0.25m (based on the Residual Peak Depth - 1% Fluvial/0.5% Tidal scenario for 2115). A condition requiring floor levels to be raised by 300mm above ground level would address this.

Foul water would be disposed of to a package treatment plant and surface water to soakaways (as existing). This arrangement is considered acceptable in this location.

The proposal therefore satisfactorily complies with Policy 4 of the SELLP and advice within the National Planning Policy Framework, 2021.

Planning Balance

Section 38 (6) of the Town and Country Planning Act, as amended by the 2004 Act, states that the determination must be made in accordance with the development plan unless material considerations indicate otherwise.

The proposal complies with the aims and objectives of Policies 1, 2, 3, 4, 23, 28, 30 and 36 of the South East Lincolnshire Local Plan (SELLP), 2019, plus advice within the National Planning Policy Framework (NPPF), 2021. There are no significant factors in this case that indicate against the proposal and outweigh factors in favour of the proposal and the policies referred to above.

Conclusion

For the reasons outlined above the planning balance lies in favour of the proposal. The recommendation is therefore for a delegated approval.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.
