Dear Sirs

4 September 1997

Application for prior approval determination under Part 24 of the GPDO in respect of permitted development by Telecommunications Code System Operator

Under the conditions laid down in part 24 of schedule 2 of the above legislation, we understand that the telecommunications development listed below falls into the category of permitted development. However, we are writing to invite your prior approval to the siting and appearance of the development as required by para A-2 (4) of Part 24.

The apparatus is required to provide urgent service commitments and we therefore wish to install this equipment as soon as possible. Your early response regarding this submission would therefore be appreciated. In accordance with the terms of the GPDO, if we have not received any response to this application within the statutory 28 days of its receipt, we intend to proceed with the development as planned.

Note: BT deploys the majority of its radio links in response to Customer orders for service which have short contractual delivery times. The overall pattern of these orders is not usually predictable and is not therefore practical to produce a radio network roll-out plan.

Contact details of Applicant

Name: David Hawkins

Tel: 0115 947 8106 Fax: 0115 950 5629

Location of proposal

Crowland Telephone Exchange. 19 West Street. Crowland. Peterborough.

O.S. sheet and six figure grid reference of proposed development.

Landranger Sheet 142 Grid Reference: 52378 / 31027

British Telecommunications plc Registered Office: 81 Newgate Street LONDON EC1A 7AJ Registered in England no. 1800000

Purpose Of development

The purpose of the development is to connect a new exchange extension to the BT telecommunications network for the provision of local and network services.

Please note that I have investigated the local area to assess if any other suitable radio masts exists in order to consider site sharing.

The proposed structure

The structure has been particularly sited to give a clear line of site to the antenna situated at Morborne Hill Radio Station,Peterborough.

See attached site plan, details of required radio link and photographs/ diagrams of proposed radio mast.

Type of structure: Metal pole with 0.6m diameter dish antenna at 12m above ground level,and a small equipment module at 4m above ground level.

Overall height: 12 metres.

Type of material and external colour of mast: Galvanised steel,grey.

The mast can be painted to any Trimite paint colour to BS4800.I suggest

Dark Olive, 10 C 39.

Distance from airfield or aerodrome

Structure is within 3km of an aerodrome or airfield: NO

The Civil Aviation Authority or Secretary of Sate for Defence (as appropriate) has been notified: NOT REQD

Please forward all correspondence to the address shown above

Yours faithfully

D A Hawkins
Radio Planning Engineer
