15m steel pole

Photograph shows 15m steel pole erected remote from the exchange with 0.3m dish aerial ODU mounted 3m above ground level. The steel pole is situated within 300m of the exchange, hence 2 coax cables can be fed underground. The pole base is back filled with concrete.

PLEASE NOTE: THE ABOVE SHOWS A 15m POLE. THE HEIGHT OF THE POLE AT CROWLAND IS 12m, WITH A 0.6m DISH AERIAL.
