CASE OFFICER ASSESSMENT

Proposal

This is a Section 73 application seeking permission to modify previously approved plans under H02-0728-21. This application was to convert 105 North Street into two dwellings together with the addition of a new dwelling to the rear. Whilst this new application will not alter the number of dwellings on site

Site Description

105 North Street is a unique property within the Crowland Conservation Area in that it's construction is unusual. Above ground floor, the building is constructed using what appear to be C20th bricks, but at ground level, the Western and Southern elevations are constructed using stonemasonry, which may have been sourced from other historic structures in Crowland. Whilst the site is not a listed structure, it is within the conservation area, at a prominent location, and with a unique style, making it a structure of importance within its setting.

The plot to the rear extends the span of the back land site and also meets Kemp Street (which is not within the Conservation Area).

The immediate area is characterised by linear development, mostly of a residential nature and with a mix of periods and styles.

History

H02-0443-88 - Erection of house and garage with vehicular access' on part of garden of Bank House - Refused

H02-0626-14 - Rear extension and internal alterations to house - Approved

H02-1078-14 - Details of external materials, doors and windows (Conditions 3, 7 and 8 of H02-0626-14) - Part Approved and Refused

H02-0811-15 - Details submitted relating to external materials, brickwork and sample brickwork panel (Conditions 3 and 5 of H02-0626-14) - Approved

H02-0003-21 - Convert 105 North Street into 2 dwellings with the addition of further dwelling to the rear - Refused

H02-0728-21 - Convert 105 North Street into 2 dwellings together with the addition of a new dwelling to the rear - re-submission of H02-0003-21 - Approved

Consultation Responses

Crowland Parish Council

CPC still have concerns regarding adequate parking and the difficulty of the manoeuvring of vehicles.

North Level Internal Drainage Board

No comments.

Lincolnshire County Council Historic Places Team

Thank you for consulting us on this application.

Following previous consultations with this office in relation to application H02-0728, a Written Scheme of Investigation (WSI) was approved, and Condition 3 was discharged. However, the implementation of the archaeological monitoring, final report, and archive are still outstanding. Consequently, Conditions 4 and 5 should not be discharged.

For further details regarding the undischarged archaeological conditions, please contact the Historic Places team at Lincolnshire County Council, Lancaster House, 36 Orchard Street, Lincoln, LN1 1YL, 07386 656079, email ruben.lopez@lincolnshire.gov.uk. As part of the monitoring arrangements, ten days' notice is required before the commencement of any archaeological works.

Lincolnshire County Council Highways

Recommendation: No objection

The proposal is for minor amendments to Convert 105 North Street into 2 dwellings together with the addition of a new dwelling to the rear - approved under H02-0728-21. Modification of Condition 2 to allow amendments to previously approved plans. The minor amendments proposed will not have an adverse impact upon the public highway or surface water flood
risk.

As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):
- Principle of Development and Sustainability
- Layout, Design and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking
- Flooding Risk Considerations and Drainage
- Biodiversity

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above .

The policies and provisions set out in the National Planning Policy Framework (updated December 2024) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

The Authority is able to demonstrate a supply of deliverable sites equivalent to in excess of 5 years through the latest Housing Land Supply Assessment.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

The most sustainable locations for development are situated within the 'Sub-Regional Centres', followed by 'Main Service Centres'. Lower down the hierarchy in respect of sustainable development are areas of limited development opportunity including 'Minor Service Centres', with areas of development constraint comprising 'Other Service Centres and Settlements'. The countryside is at the bottom of the settlement hierarchy and represents the least sustainable location.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within 'Minor Service Centres', development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities. This policy goes on to detail that development within 'Minor Service Centres' will normally be limited to Allocated and Committed sites and infill.

The National Planning Policy Framework, (NPPF) (December 2024) outlines, within Paragraph 61, that "To support the Government's objective of significantly boosting the supply of homes, it is important that a sufficient amount and variety of land can come forward where it is needed, that the needs of groups with specific housing requirements are addressed and that land with permission is developed without unnecessary delay".

Para 73 of the National Planning Policy Framework (December 2024) also emphasises the importance that the contribution of small to medium sized sites can make in meeting the housing requirements. This states that "Small and medium sized sites can make an important contribution to meeting the housing requirement of an area, are essential for Small and Medium Enterprise housebuilders to deliver new homes, and are often built-out relatively quickly". This policy seeks to ensure that there is a sufficient supply of homes and advises that sites of all sizes make a contribution to the housing requirement of an area.

As the site has permission for the conversion into two dwellings with one to the rear, the principle of such a development is sound. It is also worth noting that whilst the permission was in 2021, development has already started, meaning the permission has not lapsed in this instance.

As such, the proposal is considered to be in accordance with the requirements of Policy 1 of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, impact on highway safety and flood risk, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and

sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

Firstly, it is important to note that the plot size and shape would be altered within these amended plans, the buildings themselves therefore also change to reflect this. The change in the plot is not significant nor harmful in any aspect, the changes to the buildings will be assessed in the following paragraphs of the report.

There would be no changes to the front, garden and side elevations; the only new elevation plan submitted shows alterations to the drawing number plan 'NP/208/C'. Centrally, there would be three new roof windows, one of which being obscure glazed on the landing. Furthermore, there would be new windows on the left side of the ground floor north elevation and one in the roof. The south elevation would also feature some changes, the left side roof now features a roof light with an additional roof light on the central part (increase from two to three). Finally, there would be an extra French door replacing a previously approved window. To the east elevation, both French doors would be replaced with a window where as another French door will now be a bi-fold. A smaller window will also be slightly increased and a new back door should be introduced also. The only significant change to the west facing elevation would be an attached car port.

The previous design also incorporated hipped roofs, the new scheme now proposed gable ends - these changes would not appear harmful and would match the central feature of the dwelling. From a design point of view; these changes are not considered to be materially unacceptable or harmful and should not appear incongruous or out of character.

For the dwelling to the rear there would be some internal alterations taking place, these would include a slight change to the landing leading into the bedroom. A plant would be replaced by an en-suite as the location of this would be slightly rearranged, in its previous place, a new clothes store would be featured. As these changes are purely internal there would be no material harm.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South

East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/ Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

Despite the changes with alterations to windows, there should be no material or unacceptable harm to residents in the immediate area. The windows within the first floor as shown on drawing number 'NP/206/E' should also be acceptable with one being in the landing and one being in the en-suite, these are both non-habitable rooms. Whilst two new windows would be feature in this room, the plan shows these listed as '2000 high here'.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2024) specifically relates to 'Promoting sustainable transport'. Paragraph 116 of the National Planning Policy Framework (December 2024) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, Policy 36, to be read in conjunction with Appendix 6, of the South East Lincolnshire Local Plan (2019), sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

There is no alterations to the already approved parking arrangements nor is there an increase in number of bedrooms; there is therefore no need to increase the off road parking.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 9 of the National Planning Policy Framework (December 2024).

Biodiversity Net Gain

Schedule 7A of the Town and Country Planning Act 1990 (inserted by the Environment Act 2021) requires developers to deliver a minimum of 10% Biodiversity Net Gain using standardized biodiversity units measured by statutory biodiversity metrics. This is often referred to as the mandatory requirements for Biodiversity Net Gain.

"Under the statutory framework for biodiversity net gain, subject to some exceptions, every grant of planning permission is deemed to have been granted subject to the condition that the biodiversity

gain objective is met ("the biodiversity gain condition"). This objective is for development to deliver at least a 10% increase in biodiversity value relative to the pre-development biodiversity value of the onsite habitat. This increase can be achieved through onsite biodiversity gains, registered offsite biodiversity gains or statutory biodiversity credits".

The biodiversity gain condition is a pre-commencement condition. This relates to a condition that seeks, once planning permission has been granted, a Biodiversity Gain Plan that must be submitted and approved by the planning authority before commencement of the development, alongside the need to submit a Habitat Management and Monitoring Plan.

The effect of Paragraph 13 of Schedule 7A to the Town and Country Planning Act 1990 is that planning permission is deemed to have been granted subject to the "biodiversity gain condition". The effect of this "biodiversity gain condition" is that development granted by this notice must not begin unless:
(a) a Biodiversity Gain Plan has been submitted to the planning authority, and
(b) the planning authority has approved the plan, or
(c) the development is exempt from the biodiversity gain condition.

For applications that are submitted prior to the introduction of this requirement, the development would exempt from the mandatory 10% requirement and as such, the Biodiversity Gain Condition would not apply. However, this application was submitted following the introduction of this legislation. As such, unless comprising development that is exempt from this mandatory Biodiversity Net Gain (10%), a condition would be required, as mandatorily set.

When taking the above into account, the development in this instance is exempt from the statutory 10% Biodiversity Net Gain requirements as Section 73 applications are exempt.

Other Matters

The host application, H02-0728-21, included a total of 13 conditions, five of which needed discharging. These were discharged under H02-1012-23. As such, conditions 3, 6, 7, 8 and 9 would not be included within the decision notice of this application if it were to be approved. Following comments from LCC Historic Places it was deemed that as condition 4 and 5 have not yet been discharged they must be included on this decision notice again.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not

including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4, 28 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2024). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
