

SPECIALIST CARE

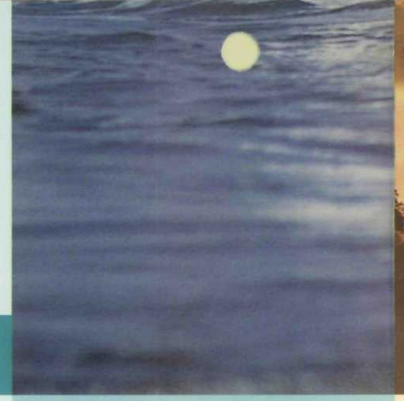

The Specialist Care Division of Sedgemoor helps young people who not only have challenging behaviour but who may also have health related problems such as Brain Injury, Down's Syndrome, Disordered Eating, Autism, Mild Cerebral Palsy, Learning Difficulties, Self Injury, Hearing Impairment, and those who have been Sexually Abused.

Single Sex Specialist Care for Girls

Within the Specialist Care Girls provision there are enhanced staffing arrangements and weekly support from a clinical psychologist and qualified art therapist. There is a multi-sensory room available on the campus.

We currently have an extensive range of large satellite houses, which are networked geographically, each accommodating between two and four young people of the same sex. This addresses the needs of young people who may find it difficult to live in a larger peer group. Each house has a team of staff, who go through a full induction programme and are all enrolled on NVQ 3 Caring for Children and Young People as part of their extensive training portfolios and are supported by appropriately qualified Senior Care Managers.

All residential provision at Sedgemoor is managed, co-ordinated and supervised directly by a team of Senior Care Managers, (all of whom are qualified and experienced Social Workers). These managers report to a Principal Care Manager.

"It did me good going to the crisis units. I really needed the time alone so I could think and get out what I wanted to say."

Toni

"We are in admiration at the quality of care that you have offered."

Local Authority Social Worker
