Application	H03-0048-25
Location	Land off Littleworth Drove Deeping St Nicholas Spalding
Proposal	Rural exception site of affordable housing comprising 24 dwellings

---

Name	Ruben Lopez Catalan
Address	Lincolnshire County Council, County Offices, Newland, Lincoln LN1 1YL LN1 1YL
Date Submitted	13-02-25
For/Against	Comments

Thank you for consulting us on this application.
It is noted that the applicant has not provided an assessment of the archaeological or heritage potential of the site, as outlined in the NPPF (paragraph 207).
The proposed site is located in an area of high archaeological potential, with evidence from the Iron Age, Romano-British, and medieval periods. The Historic Environment Record (HER) documents several known heritage assets in close proximity to the site. Specifically, the site lies adjacent to Monument Record MLI22075, which includes cropmarks of droves, ditches, and enclosures at Deeping St Nicholas. To the southwest is MLI23231, a Romano-British saltern and settlement site. To the northwest, there are MLI22074, which records cropmarks at Caulton Farm, and MLI22064, which documents Romano-British cropmarks at Willow Farm.
Recommendation: Currently there is insufficient specific information on the archaeological potential for the site and the extent of impact to buried archaeological remains from the proposed development. Therefore, I recommend that the applicant provides the results of a full standard archaeological evaluation of the site. This is in line with the guidance set out in the NPPF 2024 (paragraphs 207 & 218).
The applicant has not adequately described the significance of any below-ground heritage assets that may be affected by the proposed development, and it is not "sufficient to understand the potential impact of the proposal on their significance (the heritage assets')" (Paragraph 207 of the National Planning Policy Framework (NPPF)). This in turn does not allow the Local planning authority to "identify and assess the particular significance of any heritage asset that may be affected by a proposal." (Paragraph 208 NPPF).
Given the high archaeological potential, but as yet unknown character and extent, I recommend this application to be accompanied by the results of a geophysics survey, geoarchaeology assessment and full standard archaeological trial trench evaluation in order to properly assess the site potential, inform the appropriate planning advice and design an appropriate mitigation strategy should consent be subsequently granted. The evaluation will aim to determine the presence, absence, significance, extent depth and character of any archaeological remains which will be impacted by the proposed development as noted above.
It should also be noted that preferred mitigation strategies will include preservation in situ (avoidance of sensitive areas) where possible and open area excavation where not. It is important that this application to fully considered the implications of this in its project feasibility assessment and that the results have been considered in designing the layout. The ability and flexibility for this is only as good as the knowledge of extent, character and significance of the archaeological resource on the site. We cannot plan mitigation appropriately against unevidenced conclusions.
It is also important to avoid any unnecessary planning conditions that would place an unreasonable planning burden on the scheme if significant archaeology were discovered during post-consent evaluation work. Paragraph 57 of the NPPF applies in this case.
This information should be provided with the application so that an informed planning recommendation can be made and to meet the requirements of the National Planning Policy Framework (NPPF) paragraphs 207 and 218. With respect to the archaeological evaluation, please contact the Historic Places team at Lincolnshire County Council, Lancaster House, 36 Orchard Street, Lincoln, LN1 1YL, 07386 656079, email ruben.lopez@lincolnshire.gov.uk to discuss the requirements and request preparation of a brief for the works.
