CASE OFFICER ASSESSMENT

Proposal

This is a householder application seeking permission for a single storey side extension at White Bungalow, Home Farm, Littleworth Drove, Deeping St Nicholas.

The proposed extension would project from the side and partly beyond the rear elevation of the original house, extending from the side elevation by approximately 5963mm and having a length of 9000mm resulting in it sticking out from the rear by 2250mm. The extension would be level to the eaves with the ridge height being slightly dropped in comparison to the host dwelling.

It would be constructed from a white render, plain tiles to match, grey uPVC for new and replacement windows as well grey uPVC composite doors.

Site Description

The site is located within the defined settlement boundary of Deeping St Nicholas as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP). White Bungalow is located centrally within the settlement set behind Wisteria House and directly adjacent to Home Farm, a residential development is currently being carried out across the road from this site.

History

H03-1578-88 - Outline application for residential development - Approved

H03-0061-21 - Single storey extension to form orangery - Approved

Consultation Responses

Lincolnshire County Council Highways

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Comments:

The proposal is for a single Storey Side Extension. There is sufficient parking and turning demonstrated on the proposed site plan and the dwelling is away from the public highway. Access will be maintained to the dwelling through the Section 38 development. The proposal will not have an adverse impact on the public highway. As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Welland and Deeping Internal Drainage Board

No comments.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):

- Principle of Development and Sustainability
- Layout, Design, and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking
- Flood Risk

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above .

The policies and provisions set out in the National Planning Policy Framework (updated December 2024) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Furthermore, where a Neighbourhood Plan has been adopted, this alongside the adopted Local Plan, forms part of the Development Plan for the District, and must be considered when assessing development proposals. In this instance, no relevant neighbourhood plans have been adopted.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is in Deeping St Nicholas as detailed by Policy 1. Regardless of such, the proposal solely relates to an extension to an existing and established residential dwelling and therefore, the principle of such development is considered to be appropriate, comprising an appropriate form of development for the location.

As such, the proposal is considered to be acceptable with the requirements of the South East Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed

development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

As stated previously, the extension would project from the side elevation by around 5963mm, by roughly 9000mm and has a total height of 5400mm. The site has previously had permission for an orangery, which is partially constructed on site, and thus this extension would further increase the floor space of the site. Despite this increase, the extension is still considered to be proportionate and acceptable, as the increase is not considered to be harmful. The site benefits from not being visible from the public highway due to its location behind an existing residential property.

As the materials of the extension would match the existing dwelling, this ensures that it does not appear incongruous or out of character in relation to the host dwelling. In any case, the dwelling is mostly concealed from view of the highway due to it being significantly set back and behind Wisteria House. Whilst there are various designs of dwellings within the immediate area this should not cause any issues again due to the dwellings location.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

Due to the dwelling being set back from the highway, the nearest dwelling in relation to this is 30m to the north. As such, this is a more than adequate distance to ensure that there would be no material overshadowing or overlooking harm caused by the extension. It should be noted that there has been recent approval on an adjacent site for 119 dwellings and a village hall under H03-0598-24 - the extension would be only 750mm from the southern boundary which would adjoin a new dwelling following the construction. In any case, due to the positioning of the site, this should not result in an impact to the amenity of residential properties with the extension also being slightly lower in height in comparison to the host dwelling.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2024) specifically relates to 'Promoting sustainable transport'. Paragraph 116 of the National Planning Policy Framework (December 2024) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, Policy 36, to be read in conjunction with Appendix 6, of the South East Lincolnshire Local Plan (2019), sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The extension will see an increase from two to four bedrooms on site, as such there will need to be room for four vehicles to be kept via off street parking. The access to the dwelling leads directly to an area with turn around space and parking of multiple vehicles, meaning the development would accord to Appendix 6. Lincolnshire County Council Highways raised no objections to the scheme either stating that 'There is sufficient parking and turning demonstrated on the proposed site plan and the dwelling is away from the public highway, access will be maintained to the dwelling through the Section 38 Development. The proposal will not have an adverse impact on the public highway'.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 9 of the National Planning Policy Framework (December 2024).

Flood Risk

Section 14 of the National Planning Policy Framework (December 2024) explains that "Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere".

This goes on to state, within Paragraph 172, that all plans "should apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

It is important to note that whilst minor developments such as householders must meet the requirements for site-specific flood risk assessments, they should not be subject to the sequential test, nor the exception test, as outlined in Paragraph 176 and to be read in conjunction with footnote 62.

The site lies within Flood Zones 2 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan (2019) is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

Despite the property being within Flood Zone 2, it is within an area of no hazard within the SFRA. Further to this, as the application is purely for a side extension to an existing residential property; there would not be any significant harm raised and it would not materially increase the flood risk for the site and surrounding area in a harmful way.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan (2019) and the intentions of the National Planning Policy Framework (December 2024) in this regard.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development inside the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4, and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2024). There are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
