

The results of the most recent Parish Plan Questionnaire placed the requirement for a Village Hall at the top of the list of priorities for the Parish Council.

It is noted that there is currently an application for 24 affordable homes, H03-0048-25, in Deeping St Nicholas, which could negate the need for more.

Deeping St Nicholas, by geographical design, makes it difficult to get around without a car. Also, with the application site being on the opposite side of the main road and railway line to the primary school, this would make walking with young children particularly treacherous, especially in bad weather.

Whilst the PC understands the need for school provision and healthcare, we have to uphold the wishes of our constituents, which is the provision of a village hall.
