POSTROOM

To whom it concerns,

Re - Trees at 15. Quadring Road

Donington, Lincs.

I am the owner of the property, and it is tenanted by Michelle Baxter, partner and her two children and a dog.

I have had two tree surgeons to take a look at the trees to give their expert opinion on the work needed and price wise of course. 1, Willow nearest house, back to where you can see it has once been cut back, and to keep it at that height when necessary to cut back again.

2, Silver birch in the middle of the garden near willow cut back down by 33% to 50% depending on where tree surgeon feels is right and to keep it at that height as required.

3, Silver birch on left of garden, back to house and back to back garden cut down by 50% and to keep it again at that height as required.

4, Sycamore and ash cut tops of as advised again by tree surgeon and again to keep at that height as required.

5, Smaller willow, I was going to say to cut off side overhanging into neighbours, but sun 19th July winds brought it down into the neighbours garden it appears to have been rotten. I am extremely thankful that no one was under it and hurt

and no damage was done. I now want to take down the remainder of the tree as it is leaning quite a lot to one side, in case it falls down. I do not want to take responsibility for anyone getting hurt, and the height of the other trees comes into this as well.

b, The hedge of conifers to cut right down this being an hedge, being of more than 4 conifers. Being no preservation orders on hedges or conifers. These are a ridiculous height, hanging right over the neighbours garden, extremely close to his fence making maintenance a problem and causing problems at ground level.

Thank-you, I await your reply

Yours Sincerely
Pm Britliff (ms).
