All up and over doors have inner release handles as standard

It's easy to see why the Spar range is our best selling. The model shown here provides ample space for an average size car. Wider models can accommodate two small cars. Add an extra length and you've got room for a workshop, utility or storage area.

Throughway doors can also be fitted on the rear of the garage for drive-through access. Main doors on models 11' and over can also be offset – positioned to the left or right.

Full details of these special options are available on request.

For your maintenance free garage, select PVCu fascias, fixed or opening windows, plastisol up and over or personal doors.

Your Spar Apex garage can be converted into a workshop by replacing the up and over door with a steel personal door at no extra cost.

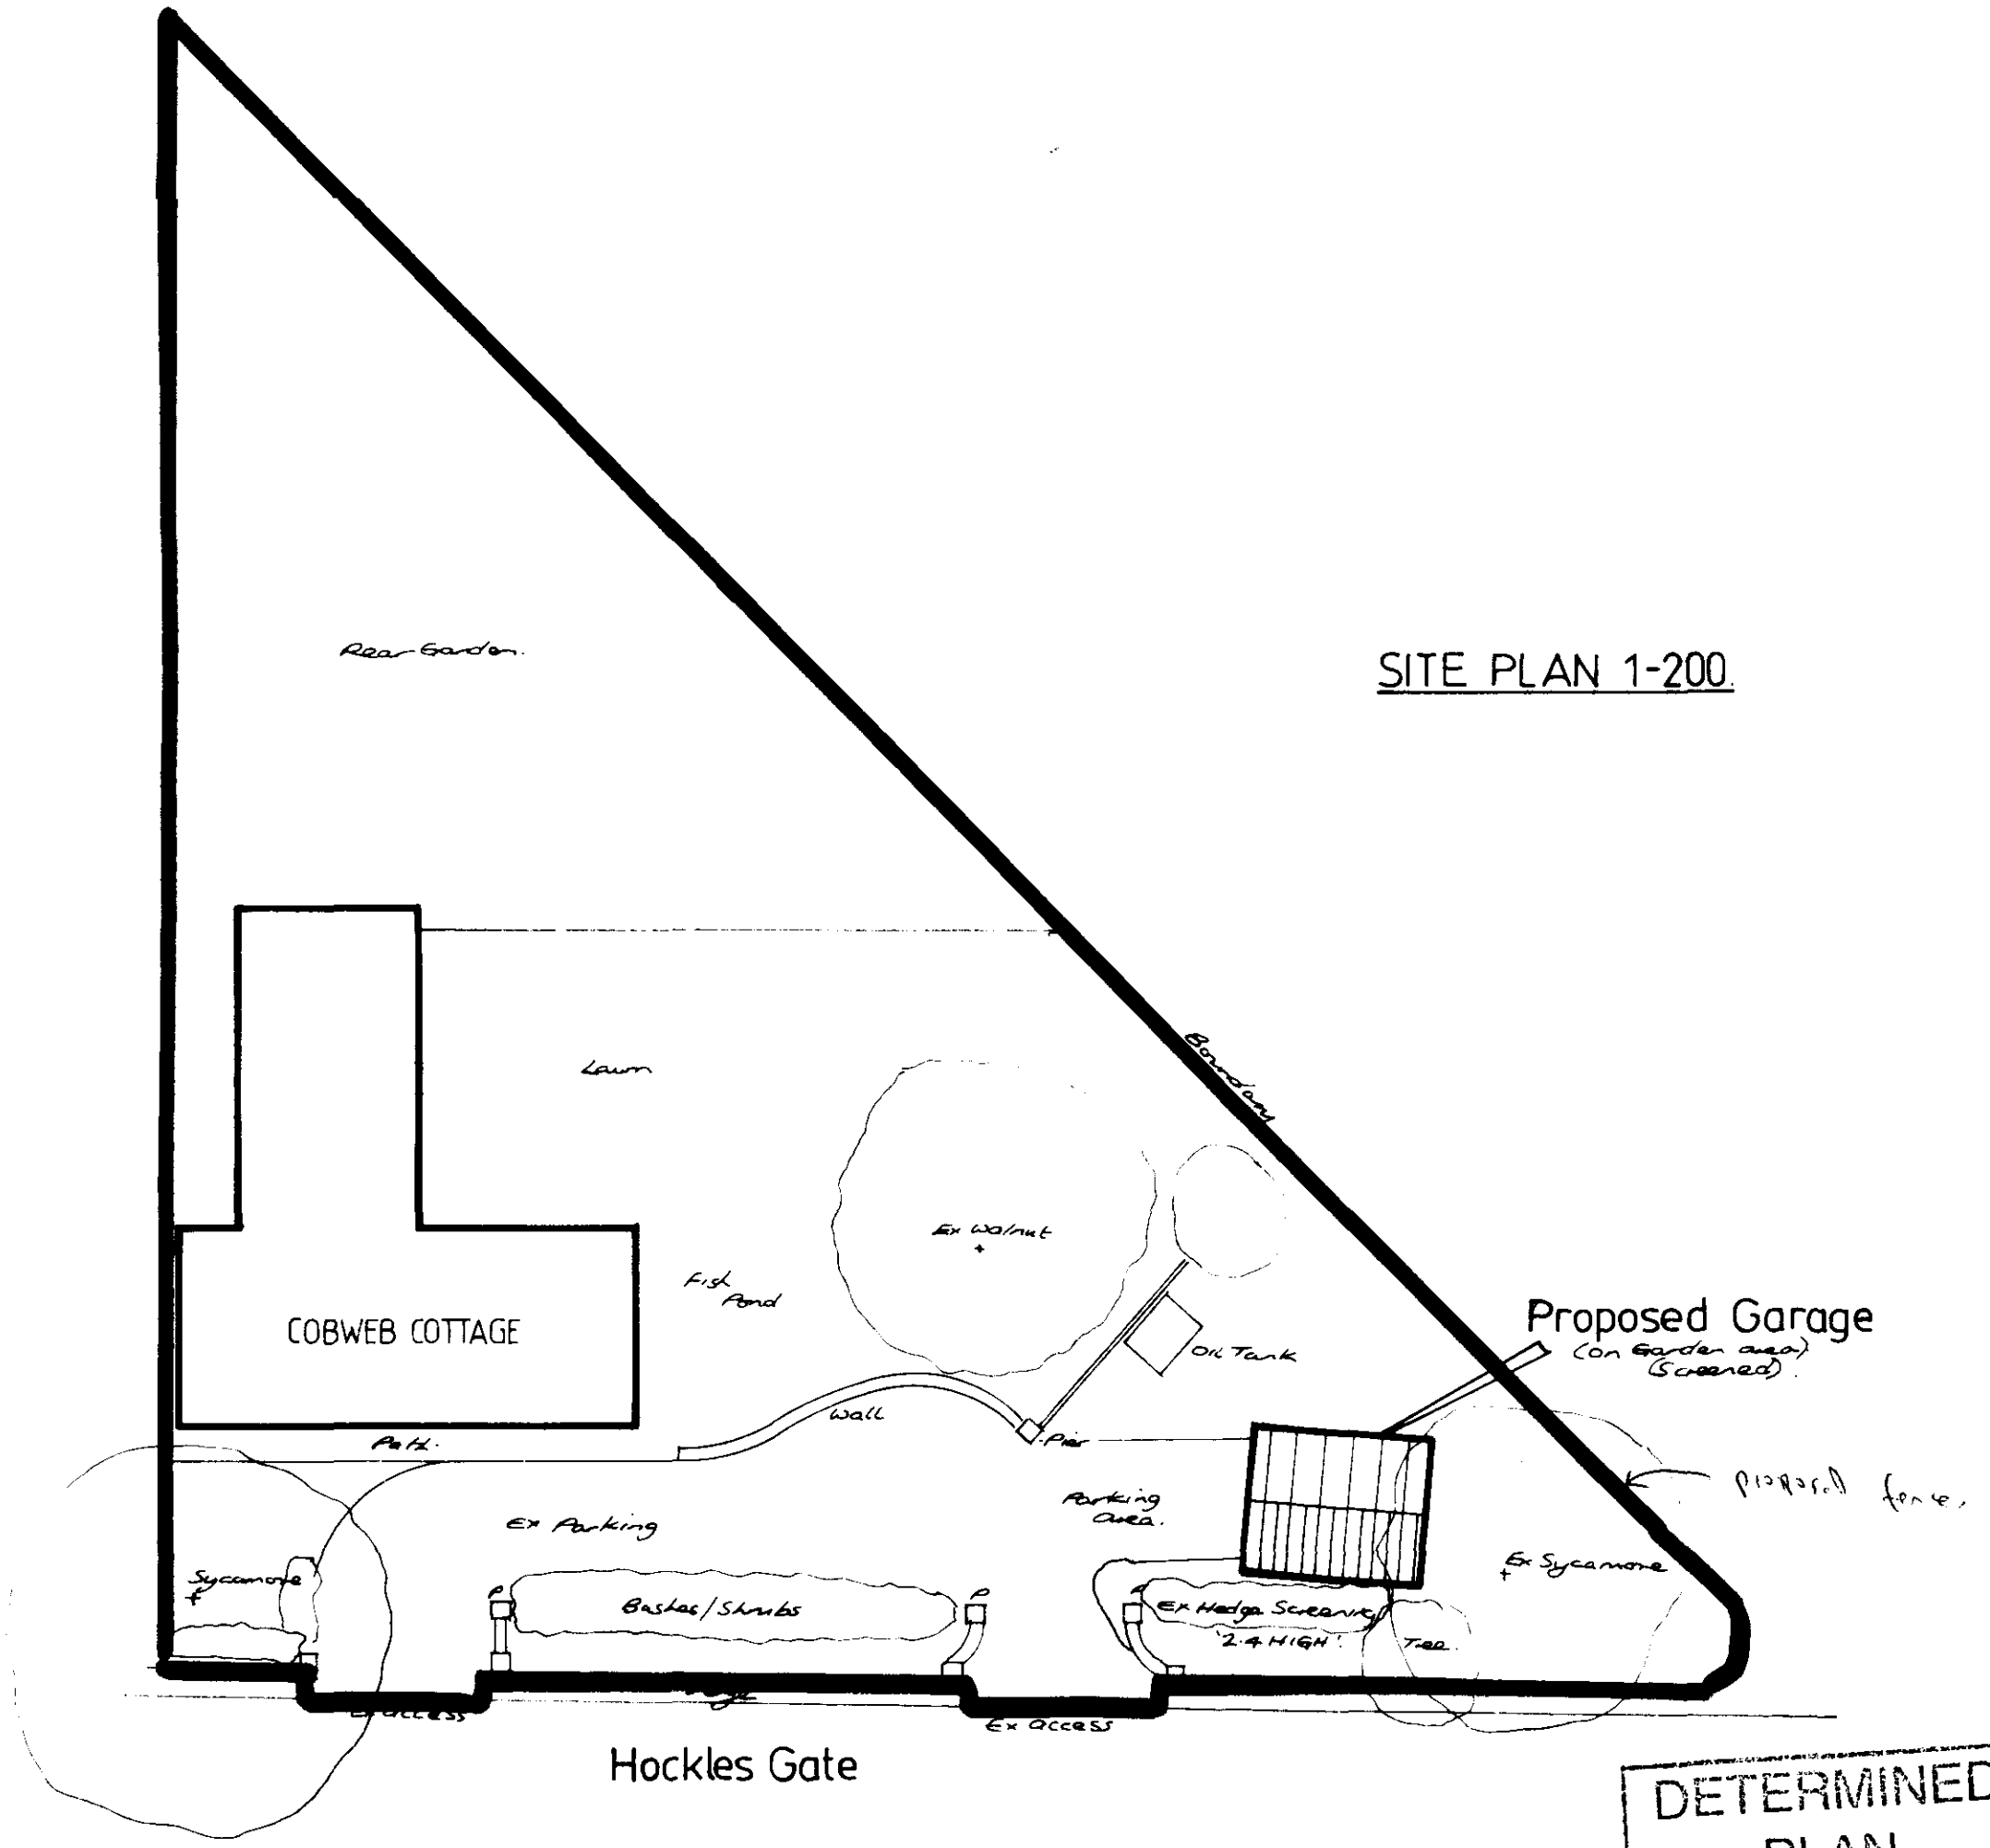

Coloured roof sheets in a choice of four colours enable you to personalise your garage.

- **Attractive, maintenance-free Spar aggregate finish**
- **One timber fixed window supplied as standard**
- **Door M or E supplied as standard, dependent on width with inner release handle**
