About this product

Often referred to as tile effect roofing sheets, these Tile form roof sheets are designed to look like an authentic pan tile roof. Made from the best quality steel available, our Tile form roof sheets really do give the appearance of traditional clay tiles. Using 0.6mm galvanised Swedish Steel, they are formed and then given an extremely tough and hard-wearing Mica coat on the external face. With its profile height of 41mm, each pantile roof sheet covers a width of 1,000mm when installed and is
