## External Play Space Details

Area 1

This area will be decked with a covered over roof area and will be immediately off from the conservatory and used in all weathers with the children, from the ages of 3 - 5 taking part in what is called a free-flow system. This is a seamless play provision between the outdoor and indoor, which the Willows will fortunately be able to operate and thus promote learning outdoors in all weather. We would imagine that this area, will be the most popular with the 3 - 5 year olds, and is situated the furthest distance away from the bungalows. The noise would be at a minimum because of the shelter offered by the structure. This area would be in use at all times. The following equipment would be an example of what will happen in this area:

- Painting easels
- Tuff spot for small world play
- Musical instruments
- Sand/water table
- Creative opportunities, including dressing up
- Small table top activities that can happen indoor and outdoor.

Area 2

Quiet zone containing, possibly the following:

- Picnic table or low level seating
- Sensory garden area
- Wooden carvings

Area 3

Sunken sand pit for the children to be able to get into. This will have a cover over the top so children can play in here and be protected from the sun.

Area 4

This is the access that can be used as a fire exit.

Moving away from house, along the side of the fence, there is a shed, that will have the doors opening out onto the garden. The current shed can just be seen on picture one. This will house, children's outdoor play toys, pushchairs and any wheeled toys.

Area 5

This is at the end of the garden and will be the 'Secret Garden adventure'. There is a path way that goes behind the flower bed and under the trees. Possible resources within this area:

- Willow structures to hide in
- Den making resources
- Weavings in the trees, including other outdoor learning mobile resources to support literacy and numeracy development, as well as wind chimes.

Area 6

This is a wooden chalet, that will be turned into an outdoor classroom. It is intended initially to fence off the area around the frontage of the chalet to allow a separate space for the babies (0-2) year olds to explore safely.

Area 7

There is a greenhouse here, that we intend to keep but to provide a fence around to make safe. Within here will be a range of fruit, veg, herbs, flowers that the children are going to grow with some produce being used in the kitchen for their lunch. Behind the chalet and the green house, there is another area that can't be seen. It is the area, nearest the bungalow. There is already a designated area for compost and further vegetable patch, which we intend to keep, with a water butt, and to support children's early knowledge of recycling and sustainability. This is one of the garden zones that will be heavily supervised.

Area 8

Climbing frame structure with change of surface flooring to allow for safety. The climbing frame structure has not been purchased as yet, but will be fairly low level as it will cater for the 2 - 5 age range. Only the very top is likely to be able to be seen from the adjacent bungalow. In fact, this is the only part of the garden that we envisage will be new and able to be seen by our neighbours.
