MegaStor Galvanised Steel Water Storage Tank

Description:

The steel support structure of an MegaStor tank is engineered for strength and durability, with a built-in 40% safety margin to ensure long-term reliability.

Product Overview:

Variants: Available in short and long panel options to suit different space requirements.
Capacities: From 2m³ to 2000m³, ideal for residential, commercial, and industrial use.
Easy Installation: Designed for quick setup with step-by-step guides.
Portable: Compact and easy to transport, perfect for mobile or remote applications.
Scalable: Link tanks in series or parallel to increase capacity as needed.
Flexible: Fully demountable for temporary or relocatable storage.
Versatile Installation: Can be installed above ground, half-buried, or fully buried.
Customisable: Powder coating available in various colours to suit your site or branding.
Multi-Use: Suitable for storing other liquids, not just water.

MegaStor Water Tank Base Requirement Installation Details:

Tank Diameter (Meters)	Tank Diameter (Feet)	Minium Base Diameter (Meters)	Concrete Required (m3)	Sand Required (m3)
11.89	39	12.49	12.25	5.55
