Coquina C-1	 Aqua Blue D-1	 Sand C-3	Cream C-4	 Steel Blue D-2

Selection Guide

Note: Colour selections on this chart approximate as closely as possible the appearance of colour hardener when used on horizontal troweled and/or imprinted concrete. Variations can be expected due to job conditions, finishing techniques, use of sealers and slight raw material colour shifts. Release agent is intended to enhance surface highlighting product only, and will not match colour chart exactly. Certain combinations of colour hardener and release agent can produce dramatically different colour appearance than anticipated due to pigment interaction. It is strongly advised to produce a sample(s) prior to installation to determine actual colour outcome.
