DESCRIPTION: Install additional GRP equipment kiosk & 6 metre free-standing radio mast, adjacent existing control kiosk

LOCATION: Main Road SPS, opposite layby A17, Gedney, Spalding

Parish Council: Considers this proposal to be an eyesore and would like to know what is the purpose of the mast.

County Highways: No comments - trunk road.

Department of Transport: Does not wish to raise objection.

PLANNING POLICIES/DOE ADVICE
Outside IBD.
Planning Policy Guidance Note 8 (1988) - Telecommunications.

PLANNING ISSUES
1 The fundamental issue is whether the proposed mast would be visually obtrusive and if so, whether the mast is nonetheless essential.
2 There is also the issue of whether the proposed radio mast would give rise to interference with radio and television reception.
3 The proposal entails the erection of a 6 metre high radio mast and installation of a 1.5 metre high telemetry kiosk constructed of glass reinforced plastic coloured green. The kiosk would contain equipment to monitor the operation of the neighbouring pumping station. The proposed radio mast would enable the monitored information to be transmitted elsewhere for the purposes of control.
4 The site which lies adjacent to the A17, already has installations including a stench pipe some 8 metres high and a control kiosk.

CONCLUSIONS
1 Given the operational need for the equipment (there is no telephone link and additional linescape and poles would have

to be provided to install one) and the existence of existing equipment adjacent to the busy A17 road, it is not considered a visual objection to either the additional kiosk or the radio mast could be substantiated.

2 With regard to radio and television interference, the applicant's agent has advised that "there are no known instances of similar installations affecting television reception". It is considered this should be taken at face value particularly as Planning Policy Guidance Note 8 states "Planning Authorities should not attempt to seek out or anticipate potential problems of radio interference or be influenced in their approach by the mere possibility that such interference might arise".

RECOMMENDATION - Permission be granted.

PLANNING PERMISSION APPLICATIONS
H08/0861/92
GEDNEY - MAIN ROAD SPS - REF. ~~H02/0683/92~~

We refer to the telephone conversation between your Mr. J. Blacklock and our Mr. A. Flindall of 16th September 1992.

The purpose of the development to which the above application pertains is to install telemetry equipment at the existing sewage pumping station. This equipment allows Anglian Water to remotely monitor the operation of the pumps to provide an efficient service to their customers. In addition, if for any reason a failure occurs, e.g. loss of power to the site, the telemetry system will promptly notify the Control Centre of the alarm condition.

Our Client's preferred method of communication is by radio, hence the requirement for the radio mast. Radio communication is a faster, more reliable and therefore more efficient alternative to communicating via a telephone line; the other option.

We believe that the installation of the proposed radio mast will not markedly degrade the area's visual amenity due to its proximity to a major highway and the presence of lighting pillars, overhead power lines and the pumping station's vent pipe. Furthermore, we understand that telephone services in the vicinity are on overhead lines. Therefore, the option of communication via telephone line may well require the erection of telegraph poles from the nearest properties to the pumping station, which could constitute a loss of visual amenity.
