The steadily heightened and well-documented human, physical and social risk for any one of the 100 million people in the United States who are at least 65 years of age is a topic that has long been a subject of research and report by a large number of the American Medical Association's (AMA) constituent organizations. The AMA's position on the issue of aging has been shaped by the knowledge and experience of its constituent organizations, which are the largest and most influential of the medical and health care professions in the United States. The AMA's position on the issue of aging has been shaped by the knowledge and experience of its constituent organizations, which are the largest and most influential of the medical and health care professions in the United States.
