The buildings proposed for replacement are adjacent to a listed tower mill known to be in use in around 1824 and form part of the setting of the designated asset. Historic mapping shows Mill House and the buildings to either side once formed part of the mill yard and the buildings would have been integral to the operation of the mill at various times. As such they may hold information relevant to a greater understanding of the workings of the mill and its development. Currently there is insufficient evidence to establish the impact on the significance of the designated asset by the proposed replacement and alterations.

Recommendation: That a decision on the application is deferred until such time as the applicant has submitted a heritage impact assessment which clearly demonstrates the significance of the buildings proposed for demolition and the effect on the appreciation and understanding of the listed mill building.
