Statement re application for change of use of land at Ryecroft House, North Road

I confirm having planted the trees as shown on the attached sample invoices during September/October 2005. I then continued to plant approximately 1500 further trees through 2006 and 2007. This included the conifers round the perimeter of the land, the fruit trees in the orchard areas and the trees within the garden area.

I have lived in North Road since before the applicants moved here and my back garden borders their land. I have been able to observe the garden being prepared and being used as such. I have also maintained the trees and hedges on a regular basis as they have grown, trimming back growth at appropriate intervals.
