
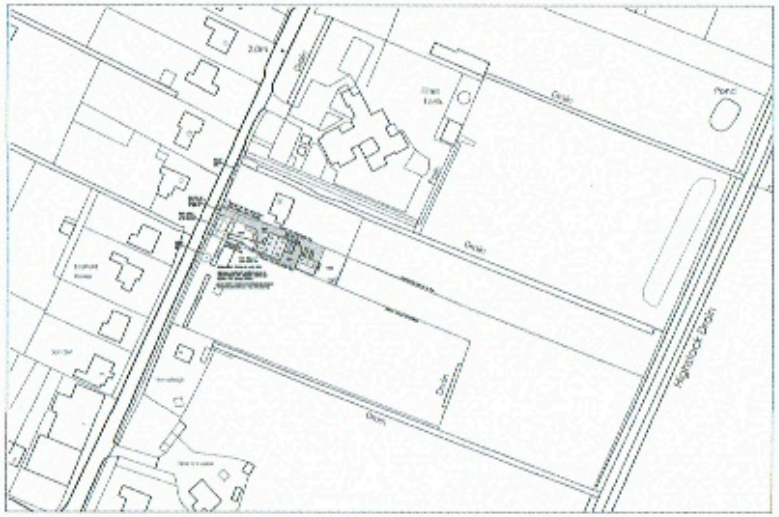
Proposed Site Plan 1:500



Location Plan 1:1250

LANDSCAPING NOTES:

SP SHRUB PLANTING TO INCLUDE:
BARBERRY(DECIDUOUS) SHELLEY POSSUMWINAC
BUDDLEIA DAVIDI'FORSYTHIA X INTERMEDIA LYNWOOD
MOCK ORANGE(PHILADELPHUS) BELLE ETOILE(MAGNOLIA)
CO NOT SIZE
PLANTING SIZE 60 - 80cm
PLANTED AT 7/8 mtrs ctrs

GC GROUND COVER PLANTS
COTONEASTER HORIZONTALIS,
HEDERA HELIX LUZII/HELIX ERIN
6 PLANTS PER METRE SQ.

NOTE:
Undertake soft landscape works generally in open weather conditions, typically early Autumn to mid March. Do not undertake seeding, turfing or planting when the temperature is below +5C and falling, when the ground is covered in snow, or frozen or waterlogged, ground or in drought conditions.

Planting should be undertaken between November and March when the plants are dormant and provided all ravages weather allows. Plants should be set at the same root depth as they were at the nursery and should be well firmed in and generously watered. Remove any damaged shoots during planting. A 75mm layer of bark mulch (Landscape Bark Multiplex Mulch or equivalent) should be applied over the planting bed to reduce weed competition.

If within a period of 5 years from the date of the planting of any tree or shrub, that tree or shrub, or any tree or shrub planted in replacement for it is removed, uprooted or destroyed or dies or becomes, in the opinion of the Local Authority, seriously damaged or defective, another tree or shrub of the same species and size as that originally planted shall be planted in the same place unless the Local Authority gives written consent to any variation.
