Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in [Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 \(as amended\)](#)) would apply?

- ☐ Yes
- ☒ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in [The Environment Act 2021](#): "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply: Development subject to the de minimis exemption (development below the threshold) What best describes the size of your site?: Over 25 square metres Please justify the reason why biodiversity net gain does not apply: "The proposed development is a single agricultural polytunnel with a floorspace below the biodiversity threshold. The development is under 1000m² and is classed as de minimis agricultural development. No habitats will be removed or impacted and the existing grass surface will remain."
Reason biodiversity net gain does not apply: Development subject to the de minimis exemption (development below the threshold) What best describes the size of your site?: Over 25 square metres Please justify the reason why biodiversity net gain does not apply: This application is for the erection of a single agricultural polytunnel for horticultural production on existing agricultural land. The proposal falls within the exemptions under Schedule 7A of the Town and Country Planning Act 1990 (as amended) and the Biodiversity Gain Requirements (Exemptions) Regulations 2024, as the development is: • Agricultural development • Temporary / low impact in nature • Does not result in loss of habitat The polytunnel will be located on existing managed agricultural land and will not adversely affect priority habitats or biodiversity features. On this basis, the proposal is exempt from mandatory Biodiversity Net Gain requirements.

Note: Please read the help text for further information why developments may be exempt or not in scope.
