

The MedPoint SOLO

The standalone, temperature controlled,
24/7 automated prescription collection solution

Shaping the Pharmacy of Tomorrow

See how your pharmacy can benefit from a simple, secure, standalone,
automated 24 hours, 7 days a week prescription collection solution:

- Frees up pharmacy space through an external, standalone unit secured by robust construction, CCTV and alarm
- Error-free prescription collection
- Enables supplementary hours reduction
- Releases hours of staff time for patient services
- Minimises customer waiting time
- Full audit trail from stocking to collection
- Ensures improved patient safety
- Offers greater pharmacy presence within the community, providing convenient prescription collection to all patients

💡 We needed a solution for 24/7 prescription collection, but could not afford to lose any space in the pharmacy so MedPoint's freestanding SOLO was perfect. It's very reassuring that throughout recent heatwaves where temperatures have reached 27 degrees and above, the SOLO has kept medicines at the appropriate temperature at all times. 💡

Basil Dabbas, Superintendent Pharmacist, Cledford Pharmacy

It's as easy as 1, 2, 3

1 Load

Place prescription bag in any vacant MedPoint channel.

2 Text

Patient receives a notification with either a unique PIN code, or QR code

3 Collect

Patient collects prescription using unique PIN or QR code at 24/7 MedPoint

No manual scanning –
fast error free loading.

Collect in as little
as 30 seconds.

Save 55+ hours per
month on prescription
handouts.

The MedPoint SOLO

Automating prescription collection through the MedPoint SOLO delivers patient convenience, increases customer loyalty and releases valuable time for your healthcare team. Designed and manufactured in Britain, MedPoint is the leading UK supplier of 24/7 prescription collection systems.

- Secure, standalone unit**
The MedPoint SOLO frees up pharmacy space through an external, standalone unit accessed through a high-security side door, into a secure, spacious loading area. Robust aluminium and composite construction, an anti-tamper alarm system, dusk til dawn lighting and 24/7 CCTV deliver further security.
- Dynamic locations**
Prescription bags can be placed in any channel available, saving time and reducing errors.
- Error free loading**
No manual scanning is required, MedPoint performs a complete scan of the prescription and channel, saving valuable staff time. Ensuring the correct prescription is collected by the correct patient every time.
- Space optimisation**
Once loaded into MedPoint, prescriptions can be relocated into different channels to optimise space usage and maximise loading capacity.
- Plug and Play**
MedPoint is PMR agnostic, it works on a 'plug and play' basis, regardless of the PMR provider.
- Secure online payment**
Patients pay for prescriptions or make their exemptions online before collection, reducing administration for the pharmacy team.
- Temperature Controlled**
The MedPoint SOLO is a temperature controlled unit, ensuring medicines remain stored within safe temperature parameters at all times.
- Easy access**
The SOLO can have access to it via a door on either the left or right hand side, depending on the unit's location. The ergonomically designed front panel means that all patients can access MedPoint without assistance.
- Media screen**
MedPoint includes a 24" screen to display rolling information about the pharmacy's other products and services
- Minimal waiting time**
The unique PIN number and/or scannable QR code is only sent to the patient once their prescription has been loaded into MedPoint and is ready for collection.
- British Manufactured**
In the unlikely event of a technical issue, one of our UK based regional engineers will attend site with readily available parts.

SOLO Construction

- All metal chassis & side framework
- Roof skin is 2mm aluminium
- Sides and front are of a composite construction:
 - 3mm aluminium composite panel
 - 60mm Kingspan insulation
 - 18mm WBP plywood

Max Capacity	168 locations.
Max Weight per compartment	2Kg.
Network Connection	Requires Ethernet socket with available IP address and internet access. 4G router for back-up connectivity.
Security	CCTV and anti tamper alarms.
UPS	Battery back-up in the event of power-cuts enables transactions to be completed and a safe shut down of the system.
Power requirements	240v, 13 A with RCD protection.
Temperature control	Ambient up to 25 degrees.
