CASE OFFICER ASSESSMENT

Proposal

This is a householder application seeking permission for the removal of a single storey conservatory and the erection of a proposed flat roof extension at 8 Salem Street, Gosberton.

The extension would protrude from the rear elevation by around 3000mm and would have a width of roughly 5300mm. Due to it featuring a flat roof it would have a total height of 2700mm. Finally, it would be constructed from grey fibre glass for the roof with the external brickwork being Birkdale Blend.

Site Description

The site is located within the defined settlement boundary of Gosberton as outlined in the South East Lincolnshire Local Plan, 2019 (SELLP). 8 Salem Street is a semi-detached property sharing its boundary with No. 6 which are both within the Gosberton Conservation Area. The on site dwelling is currently constructed from white render and the windows are set relatively low in relation to the footpath.

History

No relevant site history.

Consultation Responses

Welland and Deepings Internal Drainage Board

No comments.

Lincolnshire County Council Highways & SUDS

No Objections

Having given due regard to the appropriate local and national planning policy guidance (in particular the National Planning Policy Framework), Lincolnshire County Council (as Highway Authority and Lead Local Flood Authority) has concluded that the proposed development would not be expected to have an unacceptable impact upon highway safety or a severe residual cumulative impact upon the local highway network or increase surface water flood risk and therefore does not wish to object to this planning application.

Comments:

Removal of single storey conservatory and build new traditional flat roof extension. The proposal will not increase bedrooms and there will be no change to access/parking it will not have an adverse impact on the public highway. As Lead Local Flood Authority, Lincolnshire County Council is required to provide a statutory planning consultation response with regard to drainage and surface water flood risk on all Major applications. This application is classified as a Minor Application and it is therefore the duty of the Local Planning Authority to consider the surface water flood risk and drainage proposals for this planning application.

Conservation Officer

No objections. As the proposed extension is on an elevation that does not feature in any readily available views from the public realm, the impact of the proposal upon the designated asset (in this case the Gosberton Conservation Area) would be negligible. Therefore, I have no objections to this proposal upon built heritage conservation grounds.

Lincolnshire County Council Historic Environment

Thank you for consulting us on this. Having reviewed the application documents and the updated available Historic Environment information for this application, the proposal is unlikely to have an impact on significant archaeological remains. Consequently, no further archaeological input is necessary for this application. It is not necessary to consult us on this application again, unless there are material changes to the proposals. However, if you would like advice from us, please contact us to explain your request. Finally, as the proposal site is located within the Gosberton Conservation Area, the SHDC Conservation Officer should be consulted before any decision is made.

Public Representation

This application has been advertised in accordance with the Development Procedure Order and the Council's Statement of Community Involvement. In this instance, no letters of representation have been received.

Key Planning Considerations

The main issues and considerations in this case are (but are not limited to):
- Principle of Development and Sustainability
- Layout, Design, and Impact on the Character of the Area
- Impact on Neighbouring Residents/Land Users/Land Uses
- Highway Safety and Parking

Evaluation

Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

In this case, the adopted South East Lincolnshire Local Plan 2011-2036, adopted March 2019, forms the development plan for the District, and is the basis for decision making in South Holland. The relevant development plan policies are detailed within the report above .

The policies and provisions set out in the National Planning Policy Framework (updated December 2024) are also a material consideration in the determination of planning applications, alongside adopted Supplementary Planning Documents.

Planning Considerations

Principle of Development and Sustainability

The South East Lincolnshire Local Plan (2019) sets out the settlement hierarchy in respect of delivering sustainable development that meets the social and economic needs of the area whilst protecting and enhancing the environment; in order to provide enough choice of land for housing to satisfy local housing need, whilst making more sustainable use of land and to minimise the loss of high-quality agricultural land by developing in sustainable locations and at appropriate densities.

Policy 1 of the South East Lincolnshire Local Plan (2019) sets out a spatial strategy for delivering sustainable development across South East Lincolnshire to 2036. Policy 1 (Spatial Strategy) expresses this sustainable framework of settlements, ranking the settlements deemed to be most sustainable in descending order.

Policy 1 (Spatial Strategy) of the South East Lincolnshire Local Plan (2019) indicates that within Main Service Centres, development will be permitted that supports their role as a service centre for the settlement itself, helps sustain existing facilities or helps meet the service needs of other local communities.

The application site in this instance is in Gosberton as detailed by Policy 1. Regardless of such, the proposal solely relates to an extension to an existing and established residential dwelling and therefore, the principle of such development is considered to be appropriate, comprising an appropriate form of development for the location.

As such, the proposal is considered to be acceptable with the requirements of the South East

Lincolnshire Local Plan (2019) when viewed in principle. This is subject to the assessment against site specific criteria; including (but are not limited to) the impact of the proposal on the character or appearance of the area, impact on the residential amenities of neighbouring occupiers, and impact on highway safety, which are discussed in turn as follows.

Layout, Design and Consideration of the Character and Appearance of the Area and Heritage Impacts

Section 12 of the National Planning Policy Framework (December 2024) specifically relates to 'Achieving well-designed places' and details that the "creation of high quality, beautiful and sustainable buildings and places is fundamental to what the planning and development process should achieve" and as such, it is generally accepted that good design plays a key role towards sustainable development.

Paragraph 135, contained within Section 12 of the National Planning Policy Framework (December 2024), states that new development should function well and add to the overall quality of the area (beyond the short term and over the lifetime of the development) and should be visually attractive as a result of good architecture, layout and appropriate landscaping. This goes on to establish that it is important that new development should be of the highest quality to enhance and reinforce good design characteristics, and that decisions must have regard towards the impact that the proposed development would have on local character and history, including the surrounding built environment and landscape setting such as topography, street patterns, building lines, boundary treatment and through scale and massing.

Development proposals should also ensure that developments create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users, among other considerations.

Likewise, Policy 2 of the South East Lincolnshire Local Plan (2019) outlines sustainable development considerations for development proposals, providing a framework for an operational policy to be used in assessing the sustainable development attributes of all development proposals. Furthermore, Policy 3 accords with the provisions of Section 12 of the National Planning Policy Framework (December 2024), in that it requires development to comprise good design; identifying issues that should be considered when preparing schemes so that development sits comfortably with, and adds positively to, its historically-designated or undesignated townscape or landscape surroundings.

These policies accord with the provisions of the National Planning Policy Framework (December 2024) and require that design which is inappropriate to the local area, or which fails to maximise opportunities for improving the character and quality of an area, will not be acceptable.

Proposals for new development would therefore require the aforementioned considerations to be adequately assessed and designed, including the siting, design and scale to be respectful of surrounding development and ensure that the character of the area is not compromised.

The application site in this instance is in close proximity to Gosberton Conservation Area, and can be considered to comprise a site that would lie within the setting of the heritage asset, with it featuring views into and out of this.

In respect of any buildings or other land in a conservation area, special attention must be paid to the desirability of preserving or enhancing the character or appearance of that area, through Section 72 the Planning (Listed Buildings and Conservation Areas) Act 1990.

The National Planning Policy Framework (NPPF) (December 2024) expresses the importance of considering the impact of development on the significance of designated heritage assets; advising that development and alterations to designated assets and their settings can cause harm. These policies ensure the protection and enhancement of the historic buildings and environments. Proposals that preserve those elements of the setting that make a positive contribution to or better reveal the significance should be treated favourably.

Section 16 of the National Planning Policy Framework (December 2024) states that "When considering the impact of a proposed development on the significance of a designated heritage asset, great weight should be given to the asset's conservation (and the more important the asset, the greater the weight should be). This is irrespective of whether any potential harm amounts to

substantial harm, total loss or less than substantial harm to its significance".

Policy 29 (The Historic Environment) states amongst other matters that the distinctive elements of the South East Lincolnshire historic environment will be conserved and, where appropriate, enhanced, in keeping with the policies in the National Planning Policy Framework (December 2024). Development proposals will expected to conserve and enhance the character and appearance of designated and non-designated heritage assets, including archaeology, historic buildings, conservation areas, scheduled monuments, street patterns, streetscapes, landscapes, parks (including Registered Parks and Gardens), river frontages, structures and their settings through high-quality sensitive design.

As outlined above, the extension would protrude from the rear elevation by around 3000mm and would have a width of around 5300mm and would essentially replace the existing conservatory on site currently whilst extending out further slightly. As such, due to the relatively minor aspect of the extension paired with the existing rear conservatory ensures that it would not appear materially harmful and would be proportionate within the area.

Additionally, the extension is solely set to the rear of the site and is therefore not visible from the highway in any capacity. Once constructed this should cause no material harm to the street scene or the Conservation Area in which it is set and thus remains acceptable.

Furthermore, the roof would be constructed from grey fibre glass with the brickwork being Birkdale blend. The materials for the brickwork is considered to be acceptable as this would closely resemble that of the main house whilst roof is also acceptable due to the it being set to the rear and not visible.

Taking account of the design, scale and nature of the development, as detailed above, the proposal is considered to be acceptable. The proposal would not cause an adverse impact to the character or appearance of the area and would therefore be in accordance with Policies 2 and 3 of the South East Lincolnshire Local Plan (2019) and Section 12 of the National Planning Policy Framework (December 2024).

Impact on Residential Amenity/Land Users

Paragraph 135 of the National Planning Policy Framework (December 2024) states that development should create places that are safe, inclusive and accessible and which promote health and well-being, with a high standard of amenity for existing and future users; and where crime and disorder, and the fear of crime, do not undermine the quality of life or community cohesion and resilience.

Policies 2 and 3 of South East Lincolnshire Local Plan (2019) sets out that residential amenity and the relationship to existing development and land uses is a main consideration when making planning decisions.

There would be no windows on the side elevations of the extension with the sole openings being set on the rear elevation through two windows and a door. These windows would mostly provide a view into the host properties rear garden and would not materially overlook into neighbouring properties. Furthermore, the extension is of a minor scale and proportionate to the site, there would be no potential material overshadowing concerns either which could occur once the extension has been erected.

As detailed above, the scale and design of the proposal is considered to be such that there would be no significant or unacceptable impact on the residential amenities of the occupiers of adjacent properties or land users, when also taking account of the conditions recommended. As such, the proposal is considered to accord with the provisions of the Section 12 of the National Planning Policy Framework (December 2024), and Policies 2 and 3 of the South East Lincolnshire Local Plan (2019).

Highway Safety and Parking

Section 9 of the National Planning Policy Framework (December 2024) specifically relates to 'Promoting sustainable transport'. Paragraph 116 of the National Planning Policy Framework (December 2024) advises that "development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative

impacts on the road network, following mitigation, would be severe, taking into account all reasonable future scenarios".

In respect of highway matters, Policy 2 details that proposals requiring planning permission for development will be permitted provided that sustainable development considerations are met, specifically in relation to access and vehicle generation. Policy 3 details that development proposals will demonstrate how accessibility by a choice of travel modes including the provision of public transport, public rights of way and cycle ways will be secured, where they are relevant to the proposal.

Further, Policy 36, to be read in conjunction with Appendix 6, of the South East Lincolnshire Local Plan (2019), sets out minimum vehicle parking standards and requires at least two spaces for dwellings of up to three bedrooms and three spaces for dwellings with four or more bedrooms.

The extension would not see an increase in habitable bedrooms on site and therefore an increase in parking spaces is not required. There would be no alteration to the existing access arrangements or off street parking provision which presently serves the property. Accordingly there would be no material affect to existing highway conditions from either a safety or capacity perspective. Furthermore, LCC Highways have raised no objections in relation to the scheme from a highway safety perspective.

The proposal would therefore be acceptable and would not have an unacceptable adverse impact on highway safety in accordance with Policies 2, 3 and 36 the South East Lincolnshire Local Plan (2019), and Section 9 of the National Planning Policy Framework (December 2024).

Flood Risk

Section 14 of the National Planning Policy Framework (December 2024) explains that "Inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk (whether existing or future). Where development is necessary in such areas, the development should be made safe for its lifetime without increasing flood risk elsewhere".

This goes on to state, within Paragraph 172, that all plans "should apply a sequential, risk-based approach to the location of development - taking into account all sources of flood risk and the current and future impacts of climate change - so as to avoid, where possible, flood risk to people and property. They should do this, and manage any residual risk, by: a) applying the sequential test and then, if necessary, the exception test as set out below".

It is important to note that whilst minor developments such as householders must meet the requirements for site-specific flood risk assessments, they should not be subject to the sequential test, nor the exception test, as outlined in Paragraph 176 and to be read in conjunction with footnote 62.

The site lies within Flood Zones 1 of the Environment Agency's Flood Maps. These have been created as a tool to raise awareness of flood risk with the public and partner organisations, such as Local Authorities, Emergency Services and Drainage Authorities. The Maps do not take into account any flood defences.

The South East Lincolnshire Strategic Flood Risk Assessment (SFRA) provides an overview of how flood risk has been considered in shaping the proposals of the Local Plan; including the spatial strategy and the assessment of housing and employment sites. Policy 4 of the South East Lincolnshire Local Plan (2019) is clear in that "Development proposed within an area at risk of flooding (Flood Zones 2 and 3 of the Environment Agency's flood map or at risk during a breach or overtopping scenario as shown on the flood hazard and depths maps in the Strategic Flood Risk Assessment) will be permitted" in instances where specific criteria is met.

It is worth noting that large parts of the district of South Holland lie within Flood Zone 3. It is therefore necessary to use the refined flood risk information (Hazard and Depth maps) within the South East Lincolnshire Strategic Flood Risk Assessment (2017) as a basis to apply the sequential test.

The property is located within Flood Zone 1 and a no hazard area within the SFRA and therefore has a low flood risk. Furthermore, as the application is purely for a rear extension to an existing

residential property; there would not be any significant harm raised and it would not materially increase the flood risk for the site and surrounding area in a harmful way.

Overall, when considering the development on balance, it is considered that given the mitigation measures detailed and recommended by condition, the proposal accords with Policies 2, 3 and 4 of the South East Lincolnshire Local Plan (2019) and the intentions of the National Planning Policy Framework (December 2024) in this regard.

Planning Balance

As detailed above, Section 38 (6) of the Planning and Compulsory Purchase Act 2004, as amended, requires that the Local Planning Authority makes decisions in accordance with the adopted Development Plan, unless material considerations indicate otherwise.

The proposal represents appropriate development within the defined settlement boundary. The development hereby proposed does not materially harm the character or appearance of the locality, or amenity of nearby residents, and provides adequate parking, whilst conforming with the South East Lincolnshire Local Plan (2019) and the provisions of the National Planning Policy Framework (December 2024) when viewed as a whole.

In this instance, there are no material considerations that weigh against the proposal and as such, the planning balance is in favour of the development.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:
A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act
B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).
C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149. It is only one factor that needs to be considered, and may be balanced against other relevant factors.

It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

Conclusion

Taking the above considerations into account, the proposal is considered to be in accordance with Policies 1, 2, 3, 4, 29 and 36 (including Appendix 6) of the South East Lincolnshire Local Plan (2019), along with the identified sections contained within the National Planning Policy Framework (NPPF) (December 2024). The are no significant factors in this case that indicate against the proposal and outweigh the consideration in favour of the proposal and the policies referred to above.

Recommendation

Based on the assessment detailed above, it is recommended that the proposal should be approved under Delegated Authority.
