Dear Sir,

After visiting your offices recently to see how things are progressing with the planning application on behalf of the Spalding Radio Club, I noticed that the parish council are still a little concerned with the parking arrangements.

I would therefore like to point out that under no circumstances, will we find ourselves in a position where we are causing any obstructions to traffic or pedestrians.

I would also like to point out that the situation doesn't seem to be frowned upon when it applies to the local school, which is obviously a far more dangerous situation as there are children running about.

The photograph below illustrates the parking problem for the school and so I feel that the worry of half a dozen cars attending the radio club is unfounded, as we will be parking off road.

This shows cars parked all the way from the High Street, back past the gate of our property. They are parked opposite junctions, right on the very edge of junctions, and close to the bends. Quite often you cannot turn into the end of Belchmire Lane and end up having to wait in the main road.

There will not be this problem with the Radio club.
