**Planning Reference – H08-0445-24**

**Supporting Document – Building Usage**

**Site Address**

Hills Farm, Gosberton Bank, Spalding, PE11 4PB

**Development Description**

Planning approval for 1No. Storage Shed as outlined on the submitted plans EAST-11.

The proposed storage shed is to be used to store straw bales and allow the client to keep them out of the elements which can cause the bales to deteriorate and render them useless.

The storage shed will allow the client to dry and ventilate the bales to ensure that they are in optimal condition for animal feed and bedding.

Allowing the storage of bales in a dry environment, reduces the likelihood of pest and vermin infestation which reduces impact on the farm further down the line.

The proposed building is to be of similar style to the image below.
