Foul and Surface Water Disposal

For : Mr Manning , Stable Farm ,Short Drove ,Gosberton Clough ,Spalding ,PE11 4JT.

Details as requested in the planning conditions, application H08-0062-11.

A septic tank was installed on the property back in 2002 .It was professionally installed by : Lincs Pumps and Pipelines of Water Gate ,Quadring ,PE11 4PY.

The septic tank is a 600 gallon Klargester . (similar to the pics above).
It is approximately 8 ft deep with a soakaway which is 70-80 meters long and 2 ft wide x 2.6 - 3ft deep with 1ft of land drainage stone covered with a membrane then filled in with soil. The septic tank is emptied on yearly basis by a company who takes the waste away . The surface water is just left to soak into the ground as the land is very good draining.

We have had no previous problems with the septic tank or surface water flooding .
