The dish has been superimposed to highlight the effect of the installed site.

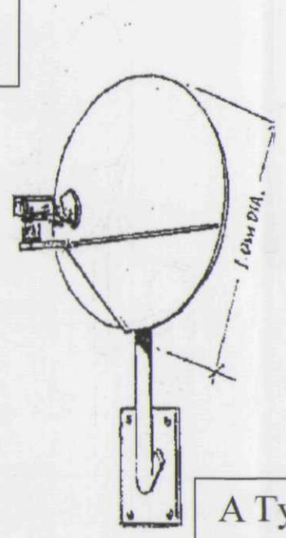

The dish position on the side of the building, overlooking the car park.

General view of the store and the local area, viewed from along the High Street.

The store and the proposed dish position, viewed from across High Street.

A Typical 1.0m DIA Satellite Antenna – Bracket Mounted

DETERMINED PLAN

AN EXAMPLE:
PREVIOUSLY INSTALLED WALL MOUNTED DISHES.

SHDC Planning & Development 12 JUN 2003 0750 103

The dish is mounted securely to the wall at a minimum height suitable for best signal reception, allowing for least visible intrusion. The installation engineer has mounted the satellite dish as high as possible up the wall, so as to ensure that the dish remains free from interference and obstruction.

The dish faces and receives a signal from a direction of 10° East.
