

FIRST FLOOR PLAN

GROUND FLOOR PLAN

TYPICAL FIRST FLOOR SECTION

Developers are advised to establish there is no made ground or wide variations in the type of subsoil within the loaded area and no weaker type of soil exists below the soil on which the foundations rest within such depth as may impair the stability of the structure.

The deposited plans have been examined against the criteria set out in the Building Regulations. It is neither practical or reasonable to show all relevant matters on working drawings, the fact that minor matters are not mentioned does not absolve the builder from the responsibility of non-compliance in the carrying out of site operations.
