For/Against Comments

Thanks for consulting us on this application,
This section commented on application H09-0332-16 and recommended the provision of a heritage Statement due to the insufficient information provided by the applicant. Subsequently, this section reviewed the information provided within the desk-based assessment technical report and other sources. It was established that there was no direct evidence for archaeology on this site, and the near iron-age, roman and medieval activity was further away. Consequently, it was recommended no further archaeological works. Having reviewed the application documents and the available updated Historic Environment information for this application, the proposal is still unlikely to have an impact on significant archaeological remains. As a result, I reiterate the previous recommendation: no archaeological input is necessary for this application.
No objection to Condition 2.
