5. What Are You Applying For?

Are you seeking consent for works to a tree(s) subject to a TPO? ✓ Yes ○ No

Are you wishing to carry out works to tree(s) in a conservation area? ✓ Yes ○ No

6. Tree Preservation Order Details

If you know which TPO protects the tree(s) enter its title or number below

TPO/009/10/1986

7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.

1 x OAK also 1 x Ash.

OAK We would like to carry out very light Selective Pruning to Raise Some very low branches to 4 metres above Car parking Spaces and remove Some dead Wood from this tree.

Ash After discussing this with Diane Fairchild we feel that due to the very prominent angle of this branch it needs to be cut down We have considered pruning back but due to its Proximity with the other trees, it Simply would be unable to Compete for light. to compromise for the removal of this tree We can replant with the Same Species within the grounds of the Home please See the Map plan.

8. Trees - Additional Information

For all trees
A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes). It would also be helpful if you provided details of any advice given on site by an LPA officer.

For works to trees covered by a TPO
Please indicate whether the reasons for carrying out the proposed works include any of the following. If so, your application must be accompanied by the necessary evidence to support your proposals. (See guidance notes for further details)

1. **Condition of the tree(s)** - e.g. it is diseased or you have fears that it might break or fall:
   If YES, you are required to provide written arboricultural advice or other diagnostic information from an appropriate expert. (✓) Yes ( ) No

2. **Alleged damage to property** - e.g. subsidence or damage to drains or drives.
   If YES, you are required to provide for: ( ) Yes (✓) No

   Subsidence
   A report by an engineer or surveyor, to include a description of damage, vegetation, monitoring data, soil, roots and repair proposals. Also a report from an arboriculturist to support the tree work proposals.

   Other structural damage (e.g. drains, walls and hard surfaces)
   Written technical evidence from an appropriate expert, including description of damage and possible solutions.

Documents and plans (for any tree)
Are you providing additional information in support of your application? (✓) Yes ( ) No

If Yes, please provide the reference numbers of plans, documents, professional reports, photographs etc in support of your application:

9. Trees - Declaration

I/we hereby apply for planning permission/consent as described in this form and the accompanying plans/drawings and additional information. ☐ Date: 14/July/2015

The Ash Tree That we feel needs to be removed is growing out at an angle of aprox 45° probably even lower it is growing from a dense Area where very little light can get to, it has got good leaf presence at its top but the top is hanging over the car parking a this very ~~a~~ procerise angle. The Weight is only ever going to put more Stress on this trunck as it developes more groth it will in our opinion ultimatly come down. at some point in the future.
