

## 0.5 Statement of Competence

Company	Specialism	Statement of Competence
<p>Green Energy International</p> 	Renewable Energy Developers	<p>Green Energy International, with over a decade of experience in solar energy development, has proven its competence in the renewable energy market. The company's team is well-versed in the solar industry and has a strong network with key stakeholders, contributing to their successful track record of delivering feasible and profitable solar projects. They commit to sustainability, minimising environmental impact by adhering to best practices in solar development. Their memberships in the Solar Trade Association and the Renewable Energy Association further attest to their dedication to high-quality, sustainable solar projects. Thus, Green Energy International is highly recommended for anyone considering developing a solar farm.</p>
<p>RPS</p> 	Planning and Environmental Consultants	<p>RPS is a renowned environmental and engineering consultancy with a broad base of over 4,000 employees across more than 30 countries. Specializing in planning advice, RPS has a proven track record in helping secure planning permissions for diverse projects, including solar farms. Their team of expert consultants offers a deep understanding of planning regulations, along with additional expertise in environmental impacts, technical aspects of solar farm design, financing, and marketing. Hence, RPS is a comprehensive resource for all aspects of solar farm development planning, making them an ideal partner for such ventures.</p>
<p>ADL Traffic and Highways</p> 	Transport and Highways	<p>ADL Traffic &amp; Highways Engineering Limited, with over 25 years of experience, is a specialist consultancy in traffic and transportation. Their expertise spans various stages of the planning process such as preparation and submission of planning applications, advice on planning policy, liaising with local authorities, and managing the entire planning process. With a successful history of securing planning permissions for various projects including solar farms, they offer comprehensive guidance in solar farm planning. Committed to sustainability and renewable energy, ADL is well-suited to assist clients planning solar farms. Their services include feasibility studies, design, construction management, and operation and maintenance, making them a valuable resource for solar farm development.</p>
<p>Pager Power</p>	Glint and Glare	<p>With over 24 years in the renewable energy industry, Pager Power is a competent choice for solar farm development. They have a track record of delivering solar projects of all sizes, utilizing a team of seasoned professionals well-versed in the</p>

		<p>solar industry. Their established network with key industry stakeholders facilitates efficient progression from concept to completion. Committed to environmental sustainability, they use best practices in their solar projects and are members of the Solar Trade Association and the Renewable Energy Association. Pager Power offers comprehensive services from feasibility studies, design and engineering, to installation and maintenance. Hence, they come highly recommended for anyone contemplating solar farm development.</p>
<p>ITP Energized</p> 	<p>Renewable Planning and Environmental Consultants</p>	<p>UK-based ITP Energised, with over 20 years of experience in the environmental and sustainability sector, is an expert choice for solar farm development. Their team of professionals brings deep industry understanding and is adept at identifying, assessing, and developing solar projects that are both feasible and profitable. ITP Energised offers comprehensive services, ranging from feasibility studies, design and engineering, installation, to operations and maintenance of solar PV systems. Their robust network with key industry stakeholders ensures efficient project progression, and their commitment to sustainability reflects in their use of best practices for eco-friendly solar projects. Hence, ITP Energised comes highly recommended for those considering solar farm development.</p>
<p>Atmos Consulting</p> 	<p>Planning and Environmental Consultants</p>	<p>Atmos Consulting, a UK-based environmental consultancy with over 15 years in the renewable energy sector, is a highly capable company for developing a solar farm. Their team's in-depth knowledge of the solar industry allows them to identify, assess, and execute profitable solar projects effectively. Atmos Consulting offers a range of services, including solar PV feasibility studies, design and engineering, installation, and operations and maintenance services. Their strong network within the solar industry enables them to promptly progress solar projects from concept to completion. Furthermore, their commitment to sustainability is reflected in their practices to minimize environmental impact. Therefore, for those considering solar farm development, Atmos Consulting is an excellent contact. This endeavor offers numerous benefits, including reduced reliance on fossil fuels, increased energy security, economic advantages, and environmental improvements.</p>
<p>Kernon Countryside Consultants</p>		<p>Kernon, a UK-based company specializing in the design, installation, and maintenance of solar farms, is highly competent in solar farm development. With over two decades of experience in the renewable energy industry, Kernon has demonstrated success in developing numerous solar farms across the UK. Their</p>
