I wish to raise no objections to this proposal on built heritage conservation grounds.

The applicant seeks the use of aluminium-framed, double-glazed fenestration. This is not typically considered to be an appropriate form for use in listed buildings. However, in this instance, the proposed new fenestration is purely for use within the newly approved section / link extension, which features a design philosophy intended to create a visual distinction between the old and the new. Therefore, use of such fenestration in these specific portions of the site is not considered to be a form of harm.

The case officer should then consider that this case may be determined positively, notwithstanding other considerations.
