Details of the pre-application advice received

Based on the information available at the time of this pre-application advice request, the proposed change of use/construction of new buildings to form a plastics recycling facility would, in principle, be capable of support. The site benefits from a CLEUD which allows the site (including areas that are currently undeveloped) to be used for B2 (General Industrial) uses and this establishes a fall-back position in terms of the use of the site.
It is assumed all waste handling operations and storage of final products would take place within the building and as such any impacts including visual impact or appearance of the wider area, noise and dust, etc are unlikely to be significant or would be capable of being controlled by way of conditions. If it is proposed use of the existing access onto the A17 then this will need to be improved/upgraded in order for this to be acceptable. Subject to sufficient information being presented in the application to demonstrate compliance with the policies identified in the Development Plan (as identified above) this proposal is capable of support.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
