

The U.S. Coast Guard is looking at the impact of autonomous systems and is testing an AI-driven system to increase a ship's awareness of the water. It is looking for the potential of improving existing navigation systems. The company that is looking at this is a small, private company.

An autonomous ship is a ship that can operate on its own without a human operator. It is a ship that can navigate, avoid obstacles, and communicate with other ships. It is a ship that can be used for a variety of purposes, including search and rescue, maritime security, and environmental protection.

The U.S. Coast Guard is looking at the impact of autonomous systems and is testing an AI-driven system to increase a ship's awareness of the water. It is looking for the potential of improving existing navigation systems. The company that is looking at this is a small, private company.
