Description

Generations of children have enjoyed swings and although their colours have become brighter, their materials more robust, the principle has remained the same.

Swings provide the most popular sensations. Swinging combines **motor coordination** and **sensory stimulation** and develops the sensation of feeling the body move in space.

The combination swing provides the opportunity for younger and older age groups to swing together.

Inclusive Elements

The swinging motion has a calming influence for children with learning difficulties.

Swinging has a positive effect on the inner ear of children with hearing impairments.

Maximum fall height

Description

The rabbit springer will challenge younger children to rock themselves, they may start off with parents and other children helping them and supporting them and as their skills develop they will be able to support themselves and rock themselves to various degrees. Spring mounted equipment develops **motor skills, coordination, sense of balance** and provides fun swinging movements.

Inclusive Elements

The oscillating movement of the springer has a calming effect for autistic children.

The rocking motion has a positive effect on the inner ear of children with hearing impairments.

Description

All of the classic "must have" play features are included on our Diabolo multiplay units. All of these play features offer children more opportunities to discover, be challenged and have fun.

Climbing Net - Nearly all children love climbing on nets and in this case alternative rope challenges are available for the different ability levels. For the younger users the net can be accessed from both ground level and via the step formed by the especially designed stainless steel frame. More advanced users may wish to climb to the top of the net at 2m high and negotiate a route over to the other side of the net, before accessing one of the platforms.

Climbing Wall - Provides an alternative route to the 1.17m platform. The button climbing holds are user-friendly supports for children's hands and feet as they make their way across the climbing wall. The anti-slip surface of the climbing wall provides additional grip. Different coloured climbing holds give a decorative appeal, as well as allowing other users to be able to offer advice as to the best hold on which to place a hand or foot in order to advance upwards.

Tower - Height 1.17m. the platform is an ideal point for users to meet and interact. The green and orange roof provides both protection from the elements and a string of visual appeal. The non-slip platform provides grip for users underfoot.

Inclusive Elements

The seat found on the underside of the slide allows children to socialise or simply take a break in the shade. It can be used as a seat, play table or hideout for those children that appreciate have some time alone, away from the hustle and bustle of the playground environment.
