Habibat Bat Boxes and Access Tiles

The Habibat Bat Box is a large, solid box made of insulating concrete with an internal roost space, which can be incorporated into the fabric of a building as it is built or renovated.

A variety of facings can be fitted to suit any existing brick, wood, stonework or rendered finish, rendering the box unobtrusive and aesthetically pleasing.

The Habibat box is suitable for species which are most commonly found roosting in buildings in the UK, such as Pipistrelle, Natterer's, Whiskered, and Brandt's bats.

All boxes in the Habibat Bat Range, are available in the following finishes:

- Unfaced for use with Render or Cladding Systems
- Standard Smooth Red, Blue, Buff
- Bespoke, to suit the product you are using on site
- As a Bat Maternity Box
- Coursed to suit existing brick or blockwork. This includes, English, Flemish, Stack or Stretcher. Speak to our Design Team to discuss which would be suitable to complete your build.
