

Best Value - Ultimate Design Specification

- 34mm x 37.5mm heavy-duty steel grid panels, with 25mm x 3mm load-bearing bars - providing maximum strength and durability - this grid size limits climbing possibilities, although it can be changed to your own specification if required
- Uprights and crossbars are manufactured using 100mm x 100mm hollow section steel, with a 4mm wall thickness
- 25mm x 25mm hollow section steel handrails to top panels
- 19mm-thick high-density polyethylene basketball backboard - extremely tough and uv stable
- 20mm diameter heavy-duty basketball ring to Amateur Basketball Association regulations - a steel net is not provided as standard, to avoid the possibility of finger traps
- Reversible basketball goal option to allow two games to be played at the same time
- Flush inner wall surfaces for continuous play
- Noise dampening feature at panel fixing points
- Non-standard, vandal-resistant fastenings are M10 x 50mm pentagon button-head screws with M10 shear nuts
- Goal posts and cross bars are painted white for increased visibility
- All panels are hot-dipped galvanised and polyester powder painted, with a 5 year guarantee against corrosion*
- 25 year metalwork guarantee against structural failure*

**** Excluding normal wear and tear, accidental damage and the result of vandalism.***
