CASE OFFICER ASSESSMENT

Proposal

The application seeks to establish if prior approval is required for the excavation of soil to form earth banks for an irrigation reservoir on land at Home Farm, Marsh Road, Holbeach Hurn. According to the application form, the agricultural unit comprises 3,500ha. Permitted development rights for agricultural development on units of 5 hectares or more are set out within Schedule 2, Part 6, Class A of the Town and Country Planning (General Permitted Development) (England) Order 2015 (GPDO) (as amended).

Site Description

Relevant Planning History

No planning applications have been submitted within the site; however, the following application relates to land approximately 150m to the west of the site:

- H09-0179-12: (Prior Notification) Excavation of spoil to form earth banks for lined reservoir - prior approval not required 02 April 2012

Consultation

As the application is a prior notification application, there is no requirement for formal consultation.

Planning Assessment

Whether the proposal is permitted development

The application is a prior notification application submitted under Schedule 2, Part 6, Class B of the Town and Country Planning (General Permitted Development Order) 2015 (as amended).

Class A states that development consisting of the following is permitted:

"A. The carrying out on agricultural land comprised in an agricultural unit of 5 hectares or more in area of

(a) works for the erection, extension or alteration of a building; or

(b) any excavation or engineering operations,

which are reasonably necessary for the purposes of agriculture within that unit."

This is subject to restrictions which are set out under Section A.1 parts (a) to (l). The proposed tank does not exceed any of these limitations, as set out below.

"a) the development would be carried out on a separate parcel of land forming part of the unit which is less than 1 hectare in area;"

The parcel of land where the development is located exceeds 1ha. As such, the proposals would not be within a separate parcel of land which is less than 1ha.

"b) it would consist of the erection or extension of any agricultural building on an established agricultural unit (as defined in paragraph X of Part 3 of this Schedule) where development under Class Q or S of Part 3 (changes of use) of this Schedule has been carried out within a period of 10 years ending with the date on which development under Class A(a) begins;"

The local planning authority is not aware of any other development that has taken place under Class Q or S within the agricultural unit.

"c) it would consist of, or include, the erection, extension or alteration of a dwelling;"

The proposed development would not consist of, or include, the erection, extension or alteration of a dwelling.

"d) it would involve the provision of a building, structure or works not designed for agricultural purposes;"

According to the submitted Background Statement (FP/2501/BS November 2025), the reservoir is necessary for the storage of rainwater to irrigate crops for the agricultural unit. A reservoir is considered to be reasonably necessary for agricultural purposes.

"e) the ground area which would be covered by

(i) any works or structure (other than a fence) for accommodating livestock or any plant or machinery arising from engineering operations ; or

(ii) any building erected or extended or altered by virtue of Class A ,

... calculated as described in paragraph D.1(2)(a) of this Part;"

Part e is not relevant as the proposal is for a reservoir rather than a building or for plant or machinery.

"f) the height of any part of any building, structure or works within 3 kilometres of the perimeter of an aerodrome would exceed 3 metres;"

There are no aerodromes within 3km of the site.

"g) the height of any part of any building, structure or works not within 3 kilometres of the perimeter

of an aerodrome would exceed 12 metres;"

As set out above, there are no aerodromes within 3km of the site.

"h) any part of the development would be within 25 metres of a metalled part of a trunk road or classified road;"

The proposed development is not within 25 metres of a metalled part of a trunk road or classified road.

"i) it would consist of, or include, the erection or construction of, or the carrying out of any works to, a building, structure or an excavation used or to be used for the accommodation of livestock or for the storage of slurry or sewage sludge where the building, structure or excavation is, or would be, within 400 metres of the curtilage of a protected building;"

The proposed development does not relate to the accommodation of livestock or for the storage of slurry or sewage sludge.

"j) it would involve excavations or engineering operations on or over article 2(4) land which are connected with fish farming;"

The site does not comprise article 2(4) land.

"k) any building for storing fuel for or waste from a biomass boiler or an anaerobic digestion system

(i) would be used for storing waste not produced by that boiler or system or for storing fuel not produced on land within the unit; or

(ii) is or would be within 400 metres of the curtilage of a protected building;"

The proposed development is not for the storing of fuel or waste from a biomass boiler.

"(l) the erection or extension of a building would be carried out on land or a building that is, or is within the curtilage of, a scheduled monument;"

The site does not feature a scheduled monument.

The proposed tank therefore accords with Class A and is considered to comprise permitted development.

Conditions of Class A

Section A.2 set out the conditions that must be met for development to be permitted under Class A. Some of the conditions are not relevant to the current proposals, however, the proposed tank meets the relevant conditions set out in parts (1) to (7). For example, the current application has been submitted to establish if prior approval is required which is required under part (2).

Summary

To summarise, the reservoir would cover an area of approximately 3.5 ha. The proposals would involve excavating land and providing earth banks that would be approximately 2.7m in height. There is a similar sized reservoir located approximately 150m to the west of the site. There are some agricultural buildings located to the east of the site and these buildings would likely provide some screening of the site from the nearest public viewpoints along Marsh Road. The landscape around the site is generally flat and relatively open, interspersed with ditches and some vegetation. For example, there is a significant tree belt to the south of the site. Based on the surrounding context and the proposed development, it is considered that the visual impact of the reservoir would be acceptable and appropriate in this case.

Additional Considerations

Public Sector Equality Duty

In making this decision the Authority must have regard to the public sector equality duty (PSED) under s.149 of the Equalities Act. This means that the Council must have due regard to the need (in discharging its functions) to:

A. Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act

B. Advance equality of opportunity between people who share a protected characteristic and those who do not. This may include removing or minimising disadvantages suffered by persons who share a relevant protected characteristic that are connected to that characteristic; taking steps to meet the special needs of those with a protected characteristic; encouraging participation in public life (or other areas where they are underrepresented) of people with a protected characteristic(s).

C. Foster good relations between people who share a protected characteristic and those who do not including tackling prejudice and promoting understanding.

The protected characteristics are age, disability, gender reassignment, pregnancy and maternity, race, religion or belief, sex and sexual orientation.

The PSED must be considered as a relevant factor in making this decision but does not impose a duty to achieve the outcomes in s.149.

It is only one factor that needs to be considered, and may be balanced against other relevant factors. It is not considered that the recommendation in this case will have a disproportionately adverse impact on a protected characteristic.

Human Rights

In making a decision, the Authority should be aware of and take into account any implications that may arise from the Human Rights Act 1998. Under the Act, it is unlawful for a public authority such as South Holland District Council to act in a manner that is incompatible with the European Convention on Human Rights. The Authority is referred specifically to Article 8 (right to respect for private and family life) and Article 1 of the First Protocol (protection of property).

It is not considered that the recommendation in this case interferes with local residents' right to respect for their private and family life, home and correspondence, except insofar as it is necessary to protect the rights and freedoms of others (in this case, the rights of the applicant). The Council is also permitted to control the use of property in accordance with the general public interest and the recommendation is considered to be a proportionate response to the submitted application based on the considerations set out in this report.

The proposed development is considered to be permitted development, as allowed by Schedule 2, Part 6, Class A of the GPDO. Prior approval is not required for the siting of the excavation of the reservoir.

Recommendation

Prior approval is not required.
