The study had several limitations. First, the study was cross-sectional, so it was not possible to determine the temporal sequence of the variables. Second, the study was conducted in a single country, so the results may not be generalizable to other countries. Third, the study was conducted in a single industry, so the results may not be generalizable to other industries. Fourth, the study was conducted in a single organization, so the results may not be generalizable to other organizations. Fifth, the study was conducted in a single country, so the results may not be generalizable to other countries. Sixth, the study was conducted in a single industry, so the results may not be generalizable to other industries. Seventh, the study was conducted in a single organization, so the results may not be generalizable to other organizations. Eighth, the study was conducted in a single country, so the results may not be generalizable to other countries. Ninth, the study was conducted in a single industry, so the results may not be generalizable to other industries. Tenth, the study was conducted in a single organization, so the results may not be generalizable to other organizations.
