Overview

Separate UV Area

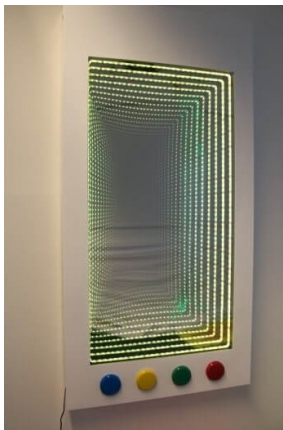

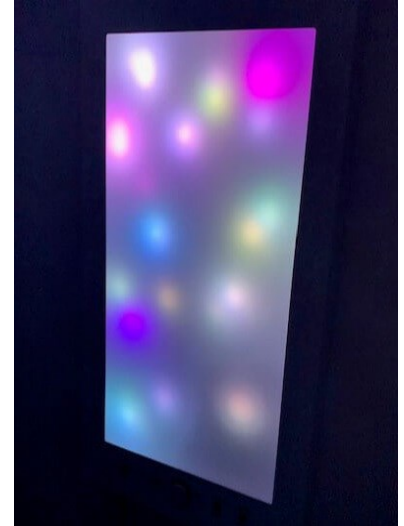

Sound Panel Plus

The Sound Panel Plus is a sound reactive wall panel for sensory and immersive rooms. Easy to set up straight out of the box. Activate it by making noise, including clapping, singing, humming or playing your own music!

The Sound Panel Plus has 13 different modes that light up with lots of different colours and effects. You can even adjust the brightness and sensitivity levels of the panel to ensure every user can play.

The Sound Panel Plus picks up sounds within the environment or through an external microphone which makes it perfect play-

Infinity Panel with Built-in Buttons

An infinite illusion of LED lights. Create a stunning effect that will engage the user. The Infinity Wall Panel is fully self-contained and easy to set up. Simply mount the frame to your chosen wall, plug and play!

The infinite effect adds the perfect ambience to any sensory room or environment. Ideal for adding depth to a sensory room and to encourage visual stimulation.

The built-in buttons on this Infinity Wall Panel add an extra in-

Light Tubes

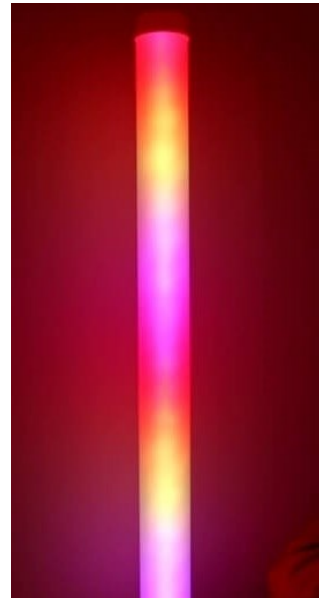

Light Tube

The popular Chroma Tube has been designed to enhance sensory stimulation, improve visual tracking skills and teach cause and effect learning with enhanced lighting display.

The Chroma+ tube has 13 unique lighting modes to engage the senses. There are also 8 different colours to visually enhance sensory and immersive spaces. Users will be delighted by the range of colours, patterns and lighting effects the Chroma+ tube can produce.

The Chroma+ tube works great with the Sensory Room Controller. Using the various buttons allow the user to switch to different modes. The remote is portable so ideal for wheelchair users in sensory rooms.

Wireless Controllers

To provide wireless Interactivity for the user the button controller and cube can be used to talk to various Interactive equipment. From LED strips to Interactive Chroma Tubes.

Carpet

Neon Black Light is designed specifically for use in leisure facilities, where there is a requirement for its striking, high impact design. As the name suggests, this design really comes to life in areas which utilize UV Black Light, where the special, light-reactive neon yarns appear to glow as if lit from underneath. Various patterns available.

UV Panel

Small Ultra violet torches can be used with the photo luminescent panel. The ultra violet reacts with the panel leaving a glowing trail. This can be used to draw or scribble any thing you wish and is a fun way to enjoy using ultra violet. After a short time the panel will return to a blank canvas ready to start all over again.

Torches

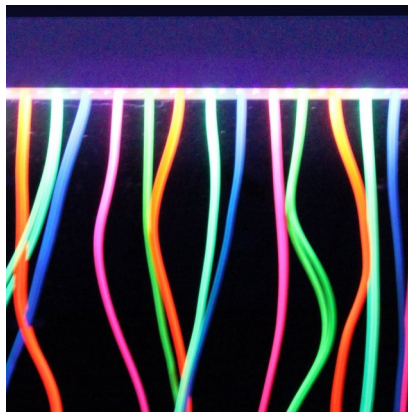

UV Tactile Panel

All the tactile appeal of this popular panel with the increased visual appeal of ultra-violet-responsive features. An engaging combination of textures, touch experiences, temperature contrasts and eye-catching focal points. Install in a darkened environment with an UV light nearby. Wooden frame.

UV Wall Strands

Decorated with lengths of vivid neon cord that fluoresce brightly under the UV light for a unique visual experience. Combining reflection and self discovery with UV light and glow in the dark colour, this captivating wall panel will provide stimulation for all needs

Lunar Projector

Ideal for theming, story telling and promoting relaxation the Lunar 250W is a stylish projector which accepts all standard rotators and accessories. It projects a very bright crisp image, and does not have the liquid wheel or brightness issues often experienced with LED illuminated projectors.

Can be wall or ceiling mounted using the bracket provided, or simply placed on a tabletop (under close supervision). Unit also features a lamp life extending function.

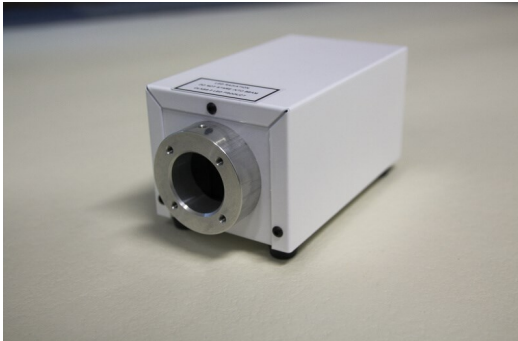

The unit requires either a wheel or cassette rotator and an effects wheel or effects cassette (not included). Operates on mains voltage. Dimensions: 325L x 125W x 100mmH.

There is a huge range of additional accessories that can added to this light making it one of the most versatile and customisable systems.

Lunar Accessories

Interactive LED Light source

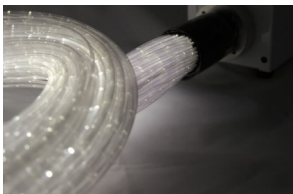

The Interactive LED Light source adds extra sensory activity by way of controllers. You can choose between using a Sensory Remote Control or Dice Remote Control to control the colour of the LEDs on the strands of the LED Light source.

Using these remote controls gives the user the benefit of colour recognition as they develop visual sensory learning. Alternative switches can be used by using the 3.5mm jack port on the Sensory Remote Control giving those with preferred switch access the ability to interact with the Light source.

The remotes are completely wireless and are therefore ideal for users in wheelchairs. The Interactive LED Light source can be placed within soft play or tucked away to save on space.

Fibre Optic Tails

Clear Fibre Optic Tails are a must have in any sensory room as they are perfect for engaging the senses whilst being efficient in utilising space. The Clear Fibre Optic tails allow for a light source that can change to different colours to create a host of lighting patterns.

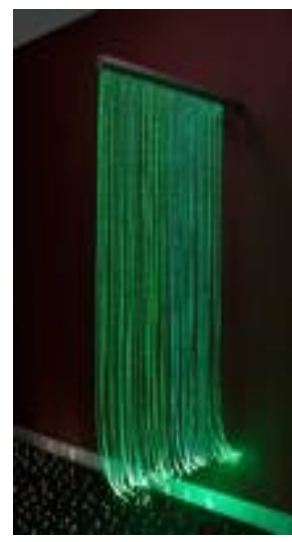

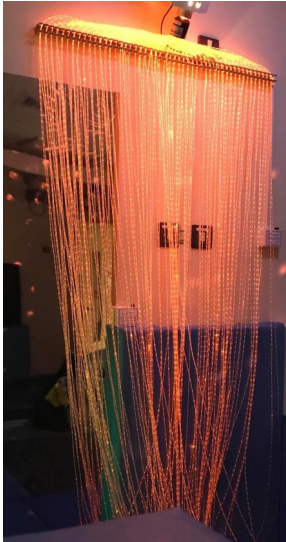

Bamboo Polymer Sparkle harnesses consist of larger diameter tails that are enclosed in a bamboo effect sheathing, delivering excellent tactile stimulation and also making them more robust and easier to handle. The fibres have been treated to allow the light to leak out along their length when attached to a light source. .

Jumbo Rainbow Fibre Optic Lights are colourful strands of light that are fun and engaging for relaxing sensory experiences. Mixing blue, red, green, yellow, pink and purple all the colours of the rainbow.

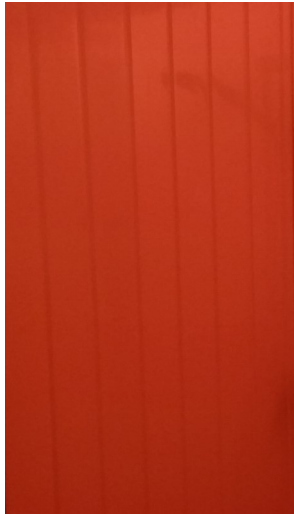

The 8.0mm thick strands are thicker than normal

Fibre Optic Curtain

A sparkling three metre fibre optic tail can be installed in your sensory room complete with a colour changing light source. The fibre optic light source can be installed on a movable bar and the fibre optic tail can be arranged to hang in a curtain effect from the bar away from the wall. The client will be able to touch

Colour Wash

Use Colour Washing to create a colour canvas for both relaxation and educational application. Any environment can be flooded with colour through the use of LED lighting and a colour controller

Select an individual colour to match the mood or preference and the colour will wash over the wall in either a vertical or a horizontal plane creating a calm and relaxing environment

Colour washing can be incorporated within the mainstream education curriculum, for example, within drama lessons as well as day-to-day project work.

For example, selecting an orange wash as a background for work on the Sun or the Great Fire of London or a deep blue to develop work on sea life and the ocean. It has proved particularly effective and beneficial to those with special needs and challenging behaviour.

LED Pin Spot and Mirror ball

Shine a Pin Spot onto a Mirror Ball to create a whole host of dancing squares of light rotating around your sensory room. The Mirror Balls are available in 200mm and 300mm diameter versions, which can be used with a Mirror Ball Motor and any of our Pin Spots

Room Sound & Vibro Acoustic

By Adding a dedicated sound amplifier to the room you will be able to play CD's & connect devices via Bluetooth. This will enable background music which can be specifically themed or just relaxing music whilst spending time in the room.

A power amplifier will enable one of your plinths to vibrate to the bass. This adds another dimension to the music so you can feel the music through vibration. All housed in a smart grey cabinet which can be locked and mounted to the wall.

Wall Pads & Plinths

Soft Wall padding and plinths are made to measure based on your room layout. Plinths can be made to accommodate mobile hoists, vibrate to sound and can include drawers for extra storage. The vinyl covering has an antibacterial coating and comes in a range of colours to suit your requirements.

Ultra Short Throw Projector

HD-ready classroom projector. Innovative teaching solution with a large scalable screen size of up to 100 inches to Display HD-ready WXGA content for enhanced learning.

Projection of client specific photos, music, memory games, reminiscence or even themed videos all important for therapy or calming. It improves motivation and recovery. *requires PC and software.

Interactive Floor System

The Integrex SENSE Micro software and high brightness projector create multiple themes and images which are combined with in-built speakers for audio effects. The range of stimulating interactive and colourful themes includes 'Splat the balloons', 'scatter the leaves' and the interactive fishpond.

The SENSE Mini has a maximum projection size of 109 x 143cm, With the addition of its unique DVD projection feature the low-cost SENSE Mini is ideal for any school or home environment

The SENSE Mini comes with approx. 300 premade pieces of interactive content to get you started and the ability to add any image, video, or audio file to create your own interactive content.
