

Why PVC-U?

Most people are familiar with the benefits that PVC-U brings to the replacement window industry, such as extra warmth, draught and sound proofing, not to mention longer lasting performance than from replacement *windows made from other materials.*

But our windows stand out from the rest. We use REHAU profiles because we want to be able to offer the widest possible range of high quality, slim profile windows to suit all types of properties.

Windows make houses REHAU Window Design
